
**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549**

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2021

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-38107

ShotSpotter, Inc.

(Exact Name of Registrant as Specified in its Charter)

Delaware
(State or other jurisdiction of
incorporation or organization)
7979 Gateway Blvd., Suite 210
Newark, California
(Address of principal executive offices)

47-0949915
(I.R.S. Employer
Identification No.)

94560
(Zip Code)

Registrant's telephone number, including area code: (510) 794-3100

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock, par value \$0.005 per share	SSTI	The Nasdaq Capital Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
Emerging growth company	<input checked="" type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2021, the registrant had 11,675,721 shares of common stock, \$0.005 par value per share, outstanding.

ShotSpotter, Inc.
Notes to Condensed Consolidated Financial Statements

Note 1. Organization and Description of Business

ShotSpotter, Inc. (the “Company”) provides precision-policing solutions for law enforcement and security personnel to help prevent and reduce gun violence and make cities, campuses and facilities safer. The Company’s flagship product, ShotSpotter Respond is the leading outdoor gunshot detection, location and alerting system trusted by 120 cities. ShotSpotter Connect creates crime forecasts designed to enable more precise and effective use of patrol resources to deter crime. The Company’s case management solution, ShotSpotter Investigate, is a cloud-based investigative platform to help law enforcement agencies modernize every phase of an investigation and accelerate case work with easy-to-use software tools. The Company offers its solutions on a SaaS-based subscription model to its customers. ShotSpotter Labs is the Company’s effort to support innovative uses of its technology to help protect wildlife and the environment.

The Company’s principal executive offices are located in Newark, California. The Company has five wholly-owned subsidiaries globally, including in South Africa, Colombia, Brazil and Mexico.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”) and applicable rules and regulations of the Securities and Exchange Commission (“SEC”) regarding interim financial reporting. Certain information and note disclosures normally included in the consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. The condensed consolidated financial statements include the results of the Company and its wholly owned subsidiaries. All significant intercompany transactions have been eliminated upon consolidation.

The accompanying condensed consolidated financial statements and related financial information should be read in conjunction with the consolidated financial statements filed with the Company’s Annual Report on Form 10-K for the year ended December 31, 2020 (“Annual Report”).

In the opinion of management, the accompanying condensed consolidated financial statements reflect all normal recurring adjustments necessary to present fairly the financial position, results of operations, comprehensive income, stockholders’ equity and cash flows for the interim periods, but are not necessarily indicative of the results of operations or cash flows to be anticipated for the full year 2021 or any future period. The Company has evaluated subsequent events occurring after the date of the condensed consolidated financial statements for events requiring recording or disclosure in the condensed consolidated financial statements.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and reported amounts of revenues and expenses during the reporting period. On an ongoing basis, management evaluates its significant estimates, including the valuation of accounts receivable, the lives and realization of tangible and intangible assets, contingent consideration liabilities, stock-based compensation expense, customer life, accounting for revenue recognition, contingent liabilities related to legal matters, and income taxes including deferred taxes and valuation allowance. Management bases its estimates on historical experience and on various other market-specific and relevant assumptions it believes to be reasonable under the circumstances. Actual results could differ from those estimates and such differences could be material to the Company’s financial position and results of operations.

The Company records net deferred tax assets to the extent the Company believes these assets will more likely than not be realized. In making such a determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax-planning strategies, and results of recent operations. In the event the Company determines that it would be able to realize its deferred assets in the future in excess of their net recorded amount, the Company makes an adjustment to the deferred tax asset valuation allowance, which would reduce the provision for income taxes.

Concentrations of Risk

Credit Risk – Financial instruments that potentially subject the Company to concentration of credit risk consisted primarily of cash and cash equivalents and accounts receivable from trade customers. The Company maintains its cash deposits at three domestic and two international financial institutions. The Company is exposed to credit risk in the event of default by a financial institution to the extent that cash and cash equivalents are in excess of the amount insured by the Federal Deposit Insurance Corporation. The Company generally places its cash and cash equivalents with high-credit quality financial institutions. To date, the Company has not experienced any losses on its cash and cash equivalents.

Concentration of Accounts Receivable and Contract Asset – At March 31, 2021, two customers accounted for 35% and 29% of the Company’s total accounts receivable, respectively. At March 31, 2020, one customer accounted for 26% of the Company’s total accounts receivable.

Concentration of Revenues – For the three months ended March 31, 2021, two customers accounted for 34% and 13% of the Company’s total revenues, respectively. For the three months ended March 31, 2020, two customers accounted for 19% and 13% of the Company’s total revenues, respectively.

Concentration of Suppliers – The Company relies on a limited number of suppliers and contract manufacturers. In particular, a single supplier is currently the sole manufacturer of the Company’s proprietary sensors.

Accounting Pronouncements Recently Adopted

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740)*, simplifying the accounting for income taxes by removing certain exceptions to the general principles. The Company adopted this ASU as of January 1, 2021. The adoption of this ASU did not have any impact on the Company’s condensed consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments — Credit Losses (Topic 326)*: Measurement of Credit Losses on Financial Instruments. The amendments in this ASU replace the incurred loss impairment methodology in current GAAP with a methodology that reflects current expected credit loss (“CECL”) and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The Company adopted this ASU as of January 1, 2021. The adoption of this ASU did not have a material impact on the Company’s condensed consolidated financial statements.

Note 3. Revenue Related Disclosures

The changes in deferred revenue were as follows (in thousands):

	Three Months Ended March 31, 2021
Balance at the beginning of period	\$ 24,578
New billings	15,432
Revenue recognized during the year from balance at the beginning of the year	(10,103)
Revenue recognized during the year from new billings	(4,898)
Foreign currency impact	(1)
Balance at end of period	<u>\$ 25,008</u>

The following table presents remaining performance obligations for contractually committed revenues as of March 31, 2021 (in thousands):

Remainder of 2021	\$ 34,403
2022	11,174
2023	4,985
Thereafter	2,560
Total	<u>\$ 53,122</u>

The timing of revenue recognition includes estimates of go-live dates for contracts not yet live. Contractually committed revenue includes deferred revenue as of March 31, 2021 and amounts under contract that will be invoiced after March 31, 2021.

During the three months ended March 31, 2021, the Company recognized revenues of \$14.8 million from customers in the United States, and \$0.2 million from customers in the Bahamas and South Africa. During the three months ended March 31, 2020, the Company recognized revenues of \$10.3 million from customers in the United States and \$0.2 million from customers in South Africa and the Bahamas.

During the three months ended March 31, 2021, the Company recognized revenues of \$13.3 million from monthly subscription, maintenance and support services, and \$1.7 million from professional software development services. During the three months ended March 31, 2020, all recognized revenues were from subscription, maintenance and support services.

Note 4. Business Acquisition

LEEDS

On November 24, 2020, the Company completed the acquisition of 100% of the membership interests in LEEDS, LLC ("LEEDS") for a purchase consideration of \$21.6 million in cash, subject to working capital adjustments, and \$2.0 million in 63,901 units of ShotSpotter common stock. The purchase consideration also included a contingent earnout agreement. Up to \$2.5 million in contingent earnout will be payable based on LEEDS' revenues generated during 2021. An additional amount up to \$2.5 million contingent earnout will be payable based on LEEDS' revenues during 2022. The amounts will be determined and paid within approximately 90 days after the end of 2021 and 2022, respectively. The preliminary fair value of the contingent earnout is \$0.2 million, resulting in a total estimated purchase consideration of \$23.8 million. The acquisition will enable the Company to broaden its suite of precision policing solutions to offer its customers.

The following table summarizes the final purchase price allocation (in thousands):

Cash and cash equivalents	\$	7,044
Accounts receivable and contract asset, net		1,060
Property and equipment, net		161
Operating lease right-of-use asset		225
Goodwill		1,437
Customer relationship		14,410
Other asset		45
Accrued expenses and other current liabilities		(458)
Other liabilities		(98)
Total purchase consideration	<u>\$</u>	<u>23,826</u>

Goodwill primarily represents the value of the employee workforce as well as cash flows from future customers. The Company expects to deduct the amortization of goodwill and intangible assets for tax purposes. A portion of the amortization deduction will commence upon settlement of contingent consideration and contingent liabilities.

The Company valued the customer relationship asset using the income approach. Significant assumptions include forecasts of revenues, cost of revenues, research and development expense, sales and marketing expense, general and administrative expense and estimated customer attrition rates. The Company discounted the cash flows at 7%, reflecting the risk profile of the asset. The customer relationship asset will be amortized over an estimated useful life of 15 years.

Acquisition-related expenses totaled \$0.8 million, \$0.2 million of which were included in general and administrative expense for the three months ended March 31, 2021. The remaining \$0.6 million was expensed in 2020.

Note 5. Fair Value Measurements

In October 2018, upon the acquisition of certain technology, referred to as HunchLab, from Azavea, Inc., the Company recognized a contingent consideration liability classified within Level III of the fair value hierarchy because

some of the inputs used in its measurement were neither directly nor indirectly observable. In January 2020 and February 2021, based on the relevant revenues earned during the second and third year respectively, of the three-year contingent consideration period, the Company paid \$0.3 million and \$0.4 million respectively, to Azavea, Inc., resulting in a reduction of the contingent consideration liability.

In November 2020, using a Monte Carlo Simulation approach, the Company estimated the fair value of the contingent consideration at the acquisition date of LEEDS to be \$0.2 million. There have been no changes in the assumptions or fair value of the contingent consideration liability at March 31, 2021.

The changes in the fair value of contingent consideration liability for the three months ended March 31, 2021 and 2020 is as follows (in thousands):

	For the Three Months Ended March 31,			
	2021		2020	
Balance, beginning of period	\$	573	\$	750
Payment of contingent consideration liability		(403)		(347)
Balance, end of period	\$	<u>170</u>	\$	<u>403</u>

Note 6. Goodwill

The changes in goodwill for the three months ended March 31, 2021 is as follows (in thousands):

	Three Months Ended March 31, 2021	
Balance, December 31, 2020	\$	2,811
Measurement period adjustment		5
Balance, March 31, 2021	\$	<u>2,816</u>

Note 7. Intangible Assets, net

Intangible assets are as follows (in thousands):

	March 31, 2021		
	Gross	Accumulated Amortization	Net
Customer relationships	\$ 14,570	\$ (393)	\$ 14,177
Patents	1,172	(1,054)	118
Total intangible assets, net	\$ <u>15,742</u>	\$ <u>(1,447)</u>	\$ <u>14,294</u>

	December 31, 2020		
	Gross	Accumulated Amortization	Net
Customer relationships	\$ 14,570	\$ (147)	\$ 14,423
Patents	1,158	(1,041)	117
Total intangible assets, net	\$ <u>15,728</u>	\$ <u>(1,188)</u>	\$ <u>14,540</u>

Intangible amortization expense was \$259,000 and \$24,000 for the three months ended March 31, 2021 and 2020, respectively.

The following table presents future intangible asset amortization as of March 31, 2021 (in thousands):

Remainder of 2021		\$	791
2022			1,027
2023			1,005
2024			983
2025			978
Thereafter			9,510
Total		\$	<u>14,294</u>

Note 8. Details of Certain Condensed Consolidated Balance Sheet Accounts

Accounts receivable and contract assets (in thousands):

Other liabilities (long-term) (in thousands):

	March 31, 2021	December 31, 2020
Operating lease liabilities	\$ 404	\$ 461
Other	170	170
	<u>\$ 574</u>	<u>\$ 631</u>

Note 9. Related Party Transactions

During the three months ended March 31, 2021 and 2020, the Company recognized \$36,000 and \$0.1 million, respectively, in revenues from ShotSpotter Labs projects with charitable organizations that have received donations from one of the Company's directors and one of the Company's significant stockholders.

Note 10. Stock Repurchase Program

During the three months ended March 31, 2021, the Company repurchased 56,162 shares of its common stock at an average price of \$9.02 per share for \$2.2 million. The repurchases were made in open market transactions using cash on hand, and all of the shares repurchased were retired. At March 31, 2021, \$4.5 million remained available for repurchase under the Company's stock repurchase program.

Note 11. Net Income per Share

The computation of basic net income per share is based on the weighted-average number of shares of common stock outstanding during each period. The computation of diluted net income per share is based on the weighted-average number of shares outstanding during the period plus, when their effect is dilutive, incremental shares consisting of shares subject to stock options, restricted stock units, employee stock purchase plan purchase rights and warrants.

The following table summarizes the computation of basic and diluted net income per share (in thousands, except share and per share data):

	Three Months Ended March 31,	
	2021	2020
Numerator:		
Net income	\$ 79	\$ 13
Denominator:		
Weighted-average shares outstanding, basic	11,584,605	11,337,491
Dilutive effect of common stock equivalents	313,757	377,935
Weighted-average shares outstanding, diluted	11,898,362	11,715,426
Net income per share, basic	\$ 0.01	\$ 0.00
Net income per share, diluted	\$ 0.01	\$ 0.00
Anti-dilutive employee share-based awards, excluded	544,815	579,601

Note 12. Equity Incentive Plans*Stock options:*

A summary of option activities under the 2005 Plan and 2017 Plan during the three months ended March 31, 2021 is as follows:

	Number of Options Outstanding		Weighted Average Exercise Price
Outstanding as of December 31, 2020	813,242	\$	24.58
Granted	65,132	\$	38.46
Exercised	(60,600)	\$	3.53
Canceled	(3,234)	\$	40.11
Outstanding as of March 31, 2021	<u>814,540</u>	\$	27.20

Restricted stock units:

A summary of restricted stock unit ("RSU") activities under the 2017 Plan during the three months ended March 31, 2021 is as follows:

	Number of Restricted Stock Units		Weighted Average Grant Date Fair Value per RSU
Nonvested at December 31, 2020	141,508	\$	29.67
Granted			37.26
Vested	(24,332)	\$	22.21
Nonvested at March 31, 2021	<u>181,584</u>	\$	33.36

2017 Employee Stock Purchase Plan

There were no shares issued under the 2017 ESPP during the three months ended March 31, 2021 as there was no purchase date during this period.

Total stock-based compensation expense associated with the 2005 Plan, 2017 Plan and 2017 ESPP is recorded in the condensed consolidated statements of operations and was allocated as follows (in thousands):

	Three Months Ended March 31,	
	2021	2020
Cost of revenues	\$ 392	\$ 217
Sales and marketing	371	256
Research and development	181	102
General and administrative	431	312
Total	<u>\$ 1,375</u>	<u>\$ 887</u>

Note 13. Commitments and Contingencies*Contingencies*

On August 28, 2018, Silvon S. Simmons (the "Plaintiff") amended a complaint against the City of Rochester, New York and various city employees, filed in the United States District Court, Western District of New York, to add the Company and employees as a defendant. The amended complaint alleges conspiracy to violate plaintiff's civil rights, denial of the right to a fair trial, and malicious prosecution. The Plaintiff claims that ShotSpotter colluded with the City of Rochester to fabricate and create gunshot alert evidence to secure Plaintiff's conviction. On the basis of the allegations, the Plaintiff has petitioned for compensatory and punitive damages and other costs and expenses, including attorney's fees. The Company believes that the Plaintiff's claims are without merit and is disputing them vigorously.

The Company may become subject to legal proceedings, as well as demands and claims that arise in the normal course of business. Such claims, even if not meritorious, could result in the expenditure of significant financial and management resources. The Company makes a provision for a liability relating to legal matters when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed and adjusted to include the impacts of negotiations, estimated settlements, legal rulings, advice of legal counsel, and other information and events pertaining to a particular matter.

An unfavorable outcome on any litigation matters could require payment of substantial damages, or, in connection with any intellectual property infringement claims, could require the Company to pay ongoing royalty payments or could prevent the Company from selling certain of our products. As a result, a settlement of, or an unfavorable outcome on, any of the matters referenced above or other litigation matters could have a material adverse effect on the Company's business, operating results, financial condition and cash flows.

The COVID-19 pandemic has resulted in a substantial curtailment of business activities worldwide and is causing weakened economic conditions, both in the United States and many countries abroad. As part of intensifying efforts to contain the spread of COVID-19, many companies and state, local and foreign governments have imposed restrictions, including shelter-in-place orders and travel bans. While some of these companies and jurisdictions have started to relax such restrictions, in some cases, the restrictions were put back in place after having been lifted. The Company understands that the ongoing COVID-19 pandemic, associated travel restrictions and social distancing requirements may continue to have an adverse impact on its results of operations. While the ultimate economic impact of the COVID-19 pandemic is highly uncertain, the Company expects that its business and results of operations, including its revenues, earnings and cash flows from operations, may be adversely impacted for at least the balance of 2021.

The Company may be adversely affected by increasing social unrest, protests against racial inequality, protests against police brutality and movements such as "Defund the Police". These events may directly or indirectly affect police agency budgets and funding available to current and potential customers. Participants in these events may also attempt to create the perception that the Company's solutions are contributing to the "problem", which may adversely affect the Company, its business and results of operations, including its revenues, earnings and cash flows from operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations together with our unaudited condensed consolidated financial statements and accompanying notes included in this Quarterly Report on Form 10-Q and the financial statements and accompanying notes and other financial information in the Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's Annual Report on Form 10-K for the year ended December 31, 2020, filed with the Securities and Exchange Commission ("SEC") on March 29, 2021. This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Exchange Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements are often identified by the use of words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "project," "will," "would" or the negative or plural of these words or similar expressions or variations. Such forward-looking statements are subject to a number of risks, uncertainties, assumptions and other factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified herein, those discussed in the subsection titled "Impact of COVID-19 and Social Unrest on our Business" below, as well as the section titled "Risk Factors" set forth in Part II, Item 1A of this Quarterly Report on Form 10-Q and in our other SEC filings. You should not rely upon forward-looking statements as predictions of future events. Furthermore, such forward-looking statements speak only as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Overview

We provide precision-policing and security solutions for law enforcement and security personnel to help prevent and reduce gun violence and make cities, campuses and facilities safer. Our flagship public safety solution, ShotSpotter Respond, is the leading outdoor gunshot detection, location and alerting system. Our patrol management software, ShotSpotter Connect, creates crime forecasts designed to enable more precise and effective use of patrol resources to deter crime. Our security solutions, ShotSpotter SecureCampus and ShotSpotter SiteSecure, are designed to help law enforcement and security personnel serving universities and corporations, mitigate risk and enhance security by notifying authorities of a potential outdoor gunfire incident, saving critical minutes for first responders to arrive. ShotSpotter Investigate™, adds case management to our expanding suite of precision policing technology solutions and provides agencies with a cloud-based investigative digital case folder and analytical and collaboration tools to improve case closure rates. In 2019, we created a new technology innovation unit, ShotSpotter Labs, to expand our efforts supporting innovative uses of our technology to help protect wildlife and the environment.

Our gunshot detection solutions consist of highly-specialized, cloud-based software integrated with proprietary, internet-enabled sensors designed to detect outdoor gunfire. The speed and accuracy of our gunfire alerts enable law enforcement and security personnel to consistently and quickly respond to shooting events including those unreported through 911, which can increase the chances of apprehending the shooter, providing timely aid to victims, and identifying witnesses before they scatter, as well as aid in evidentiary collection and serve as an overall deterrent. When a potential gunfire incident is detected by our sensors, our system precisely locates where the incident occurred and applies machine classification combined with human review to analyze and validate the incident. An alert containing a location on a map and critical information about the incident is sent directly to subscribing law enforcement or security personnel through any internet-connected computer and to iPhone or Android mobile devices.

Our software sends validated gunfire data along with the audio of the triggering sound to our Incident Review Center ("IRC"), where our trained incident review specialists are on duty 24 hours a day, seven days a week, 365 days a year to screen and confirm actual gunfire incidents. Our trained incident review specialists can supplement alerts with additional tactical information, such as the potential presence of multiple shooters or the use of high-capacity weapons. Gunshot incidents reviewed by our IRC result in alerts typically sent within approximately 45 seconds of the receipt of the gunfire incident.

We generate annual subscription revenues from the deployment of ShotSpotter Respond on a per-square-mile basis. Our security solutions, ShotSpotter SecureCampus and ShotSpotter SiteSecure, are typically sold on a subscription basis, each with a customized deployment plan. Our ShotSpotter Connect solution is also sold on a subscription basis. We expect our ShotSpotter Investigate solutions will be as well. As of March 31, 2021, we had coverage areas under contract in 120 cities and 11 campuses/sites worldwide across the United States, South Africa and the Bahamas, including three of the ten largest cities in the United States.

As a result of the COVID-19 pandemic, work-from-home and travel ban policies designed to protect the health of employees, and related government-mandated restrictions, our ability to deploy customer solutions since mid-March 2020 has been adversely impacted. While this disruption is currently expected to be temporary, there is considerable uncertainty around the magnitude or duration.

While we intend to continue to devote resources to increase sales of our solutions, we expect that revenues from our ShotSpotter Respond solution will continue to comprise a substantial majority of our revenues for the foreseeable future. ShotSpotter Labs projects are generally conducted in coordination with a sponsoring charitable organization. These projects may or may not be revenue-producing. When they are revenue-producing, they will generally be sold on a cost-plus basis. As such, ShotSpotter Labs projects will normally produce gross margins significantly lower than our ShotSpotter Respond solutions. Additionally, in early 2020, we added new pricing programs for Tier 4 and 5 law enforcement agencies (those with fewer than 100 sworn officers) that allow them to contract for our gunshot detection solutions to cover a footprint of less than three square miles, using standardized coverage parameters, at a discounted annual subscription rate.

Since our founding 25 years ago, ShotSpotter has been and continues to be a purpose-led company. We are a mission-driven organization that is focused on improving public safety outcomes. We accomplish this by earning the trust of law enforcement and providing them solutions to help them better engage and strengthen the police-community relationships in fulfilling their sworn obligation equally to serve and protect all. Our inspiration comes from our principal founder, Dr. Bob Showen, who believes that the highest and best use of technology is to promote social good. We are committed to developing comprehensive, respectful, and engaged partnerships with law enforcement agencies, elected officials and communities focused on making a positive difference in the world.

We enter into subscription agreements on a term basis that typically range from one to five years in duration, with the majority having a contract term of one year. Substantially all of our sales are to governmental agencies and universities, which often undertake a prolonged contract evaluation process that affects the size or the timing of our sales contracts and may likewise increase our customer acquisition costs. For a discussion of the risks associated with our sales cycle, see risks entitled “Our sales cycle can be unpredictable, time-consuming and costly, and our inability to successfully complete sales could harm our business” and “Because we generally recognize our subscription revenues ratably over the term of our contract with a customer, fluctuations in sales will not be fully reflected in our operating results until future periods” in Item 1A, *Risk Factors*, included in this Quarterly Report on Form 10-Q.

We rely on a limited number of suppliers and contract manufacturers to produce components of our solutions. We have no long-term contracts with these manufacturers and purchase from them on a purchase-order basis. Our outsourced manufacturers generally procure the components directly from third-party suppliers. Although we use a limited number of suppliers and contract manufacturers, we believe that we could find alternate suppliers or manufacturers if circumstances required us to do so, in part because a significant portion of the components required by our solutions is available off the shelf. For a discussion of the risks associated with our limited number of suppliers, see risk entitled “We rely on a limited number of suppliers and contract manufacturers, and our proprietary ShotSpotter sensors are manufactured by a single contract manufacturer” in Item 1A, *Risk Factors*, included in this Quarterly Report on Form 10-Q.

We generated revenues of \$15.0 million and \$10.5 million for the three months ended March 31, 2021 and 2020, respectively, a year-over-year increase of 44%. Revenues from ShotSpotter Respond during the three months ended March 31, 2021 and 2020, represented approximately 75% and 97% of total revenues, respectively. Our two current largest customers, the City of New York and the City of Chicago, accounted for 34% and 13%, respectively, of our total revenues for the three months ended March 31, 2021, and 13% and 19%, respectively, of our total revenues for the three months ended March 31, 2020.

For the three months ended March 31, 2021 and 2020, revenues generated within the United States accounted for \$14.8 million and \$10.3 million, or 99% and 98%, respectively, of total revenues. For the three months ended March 31, 2021 and 2020, revenues derived from our customers located outside the United States accounted for \$0.2 million, for both periods, and 1% and 2%, respectively, of total revenues.

We had net income of \$0.08 million and \$0.01 million for the three months ended March 31, 2021 and 2020, respectively. Our accumulated deficit was \$94.3 million and \$94.4 million at March 31, 2021 and December 31, 2020, respectively.

We have focused on rapidly growing our business and believe that its future growth is dependent on many factors, including our ability to increase our customer base, expand the coverage of our solutions among our existing customers, expand our international presence and increase sales of our security solutions. Our future growth will primarily depend on the market acceptance for outdoor gunshot detection solutions. The challenges we are facing in this regard as a result of the COVID-19 pandemic are summarized in the section below entitled “Impact of COVID-19 and Social Unrest on our Business.” Other challenges we face in this regard include our target customers not having access to adequate funding sources, the fact that contracting with government entities can be complex, expensive, and time-consuming and the fact that our typical sales cycle is often very long, difficult to estimate accurately and can be costly. We expect international sales cycles to be even longer than our domestic sales cycles. To combat these challenges, we invest in research and development, increase awareness of our solutions, invest in new sales and marketing campaigns, often in different languages for international sales, and hire additional sales representatives to drive sales in order to continue to maintain our position as a market leader. In addition, we believe that entering into strategic partnerships with other service providers to cities and municipalities offers another potential avenue for expansion.

We will also focus on expanding our business by introducing new products and services to existing customers such as ShotSpotter Connect and gaining new customers for ShotSpotter Labs. We believe that developing and acquiring products for law enforcement in adjacent categories is a path for additional growth given our large and growing installed base of police departments who trust ShotSpotter’s products, support and way of doing business. The ability to cross-sell new products provides an opportunity to grow revenues per customer and lifetime value. Challenges we face in this area include ensuring our new products are reliable, integrated well with other ShotSpotter solutions and priced and serviced appropriately. In some cases, we will need to bring in new skills sets to properly develop, market, sell or service these new products depending on the categories they represent.

Consistent with this strategy, we acquired LEEDS, LLC (“LEEDS”) in November 2020 to expand our suite of solutions with ShotSpotter Investigate. ShotSpotter Investigate is our case management solution that helps automate investigative work and improve case clearance rates – addressing an inefficiency problem for many agencies that have had to rely on multiple disparate systems to work cases. Using the software, investigators benefit from a single digital case folder that includes all elements related to a case. Analytical and collaboration tools help investigators connect the dots and share information faster while reporting helps package cases for command staff and prosecutors. When ShotSpotter Investigate is launched, we will offer a more complete precision policing platform to enable intelligence-driven prevention, response to, and investigation of crime for local, state and federal agencies.

In October 2018, we acquired the HunchLab technology and related assets that underline our ShotSpotter Connect solution. ShotSpotter Connect applies risk modeling and artificial intelligence to help forecast when and where crimes are likely to emerge and recommends directed patrols that can deter these events. We believe our investment will democratize the sharing of important intelligence with patrol officers who currently have limited direct access to crime analysts.

With respect to international sales, we believe that we have the potential to expand our coverage within existing areas, and to pursue opportunities in Latin America and other regions of the world. By adding additional sales resources in strategic locations, we believe we will be better positioned to reach these markets. However, we recognize that we have limited international operational experience and currently operate in a limited number of regions outside of the United States. Operating successfully in international markets will require significant resources and management attention and will subject us to additional regulatory, economic and political risks. We may face additional challenges that may delay contract execution related to negotiating with governments in transition, the use of third-party integrations and consultants. Moreover, we anticipate that different political and regulatory considerations that vary across different jurisdictions could extend or make more difficult to predict the length of what is already a lengthy sales cycle.

Net New “Go-Live” Cities

Net new “go-live” cities represent the number of cities covered by deployments of our gunshot detection solutions that were formally approved by customers during the year, both from initial and expanded customer deployments, net of cities that ceased to be “live” during the year due to customer cancellations. New cities include deployed coverage areas that may have been sold, or booked, in a prior period. We focus on net new “go-live” cities as a key business metric to measure our operational performance and market penetration.

Revenues

We derive substantially all of our revenues from subscription services. We recognize subscription fees ratably, on a straight-line basis, over the term of the subscription, which for new customers is typically initially one to three years in length. Customer contracts include one-time set-up fees for the set-up of our sensors in the customer's coverage areas, training and third-party integration licenses. If the set-up fees are deemed to be a material right, they are recognized ratably over three to five years. Training and third-party integration license fees are recognized upon delivery.

For ShotSpotter Respond, we generally invoice customers for 50% of the total contract value when the contract is fully executed and for the remaining 50% when the subscription service is operational and ready to go live – that is, when the customer has acknowledged the completion of all the deliverables in the signed customer acceptance form. All fees billed in advance of services being delivered are recorded as deferred revenue. The timing of when new miles go live can be uncertain and, as a result, can have a significant impact on the levels of revenues and deferred revenue from quarter to quarter. For our ShotSpotter Respond solution, our pricing model is based on a per-square-mile basis. For ShotSpotter SecureCampus and ShotSpotter SiteSecure, our pricing model is on a customized-site basis. For our ShotSpotter Connect solution, pricing is currently customized, generally tied to the number of sworn police officers in a particular city. We may also offer discounts or other incentives in conjunction with ShotSpotter Connect sales in an effort to introduce the product and accelerate sales. As a result of our process for invoicing contracts and renewals upon execution, our cash flow from operations and accounts receivable can fluctuate due to timing of contract execution and timing of deployment.

We generally invoice subscription service renewals for 100% of the total contract value when the renewal contract is executed. Renewal fees are recognized ratably over the term of the renewal, which is typically one year. While most of our customers elect to renew their agreements, in some cases, they may not be able to obtain the proper approvals or funding to complete the renewal prior to expiration. For these customers, we stop recognizing subscription revenues at the end of the current contract term, even though we may continue to provide services for a period of time until the renewal process is completed. Once the renewal is complete, we then recognize subscription revenues for the period between the expiration of the term of the agreement and the completion of the renewal process in the month in which the renewal is executed. If a customer declines to renew its subscription prior to the end of three years, then the remaining setup fees are immediately recognized.

With the acquisition of LEEDS, we also generate revenues through the sale of our ShotSpotter Investigate product from the sale of (i) a software license and related maintenance and support services to its proprietary software technology and (ii) professional software development services to a single customer, through a sales channel intermediary. The sales channel intermediary contract includes an annual, renewable subscription for software and related maintenance and support services. The contract also provides for the procurement of professional services, such as for software development and testing for product feature enhancements, by executing supplementary work orders.

It is likely that international deployments may have different payment and billing terms due to their local laws, restrictions or other customary terms and conditions.

ShotSpotter Labs projects may or may not be revenue-producing. When they are revenue-producing, they will generally be sold on a cost-plus basis.

We anticipate that, due to the ongoing COVID-19 pandemic, our customers may be facing budget shortfalls due to the increased expenditures our customers have had to endure to address the pandemic, as well as the anticipated significant tax revenue declines resulting from the economic impact that the pandemic has generated in 2020 and the first three months of 2021, the duration of which is unknown.

Costs

Costs include the cost of revenues. Cost of revenues primarily includes depreciation expense associated with capitalized customer acoustic sensor networks, communication expenses, costs related to hosting our service applications, costs related to operating our IRC, providing remote and on-site customer support and maintenance and forensic services, providing customer training and onboarding services, certain personnel and related costs of operations, stock-based compensation and allocated overheads, which includes information technology, facility and equipment depreciation costs.

Impairment of property and equipment is primarily attributable to our write-off of the remaining book value of sensor networks related to customers lost during the three months ended March 31, 2021.

We will have to upgrade our sensors that use third-generation (“3G”) cellular communications to the fourth-generation Long-Term Evolution wireless technology, which will increase our cost of revenues. Originally, we had expected to start incurring these upgrade costs in 2021 through 2022. We accelerated these plans and began to replace sensors in certain geographic areas starting in the second half of 2020 in order to optimize personnel utilization as deployments were limited as a result of pandemic-related restrictions. Accelerated bandwidth changes by our carriers may require us to continue to accelerate the upgrade of our 3G sensors prior to 2022, which would accelerate the costs associated with the upgrade, which are estimated to be approximately \$5.0 million in total. We may re-use and re-deploy the old 3G sensors that have a remaining serviceable life where it makes sense to do so. As we upgrade our sensors, cost of revenues may increase as a percentage of revenues.

In the near term, we expect our cost of revenues to increase in absolute dollars as our installed base increases, although certain of our costs of revenues are fixed and do not need to increase commensurate with increases in revenues. In addition, depreciation expense associated with deployed equipment is recognized over the first five years from the go-live date. We also expect cost of revenues to increase in absolute dollars as we continue to invest in our customer success capabilities to drive growth and value for our customers.

Operating Expenses

Operating expenses consist of sales and marketing, research and development, and general and administrative expenses. Salaries, bonuses, stock-based compensation expense and other personnel costs are the most significant components of each of these expense categories. We include stock-based compensation expense incurred in connection with the grant of stock options and restricted stock units to the applicable operating expense category based on the equity award recipient’s functional area.

We are focused on executing on our growth strategy. As a result, in the near term we expect our total operating expenses to increase in absolute dollars as we incur additional expenses due to growth. Although our operating expenses will fluctuate, we expect that over time, as a whole, they will generally decrease as a percentage of revenues.

Sales and Marketing

Sales and marketing expenses primarily consist of personnel-related costs attributable to our sales and marketing personnel, commissions earned by our sales personnel, marketing expenses for trade shows and lead generation programs, consulting fees, travel and facility-related costs and allocated overhead.

During the duration of the COVID-19 pandemic and associated shelter-in-place orders, work-from-home policies and travel bans, our sales and marketing expense has decreased and is expected to remain relatively flat as the pandemic continues. Thereafter, in the near term, we expect our sales and marketing expenses to increase in absolute dollars primarily due to planned growth in our sales and marketing organization. This growth may include adding sales and/or marketing personnel and expanding our marketing activities to continue to generate additional leads. Sales and marketing expense may fluctuate from quarter to quarter based on the timing of commission expense, marketing campaigns and tradeshows.

Research and Development

Research and development expenses primarily consist of personnel-related costs attributable to our research and development personnel, consulting fees and allocated overhead. We have devoted our product development efforts primarily to develop new lower-cost sensor hardware, develop new features, improve functionality of our solutions and adapt to new technologies or changes to existing technologies.

We are investing in engineering resources to support further development of ShotSpotter Connect and ShotSpotter Investigate. The focus of this effort will be in the areas of data science modeling, user experience, core application functionality and backend infrastructure improvements, including integration of ShotSpotter gunshot data to enhance forecasting of gun violence.

We are also investing research and development resources in conjunction with our ShotSpotter Labs projects and initiatives. The initial focus of these efforts is to develop innovative sensor applications as well as to test and expand the functionality of our outdoor sensors in challenging environmental conditions.

In the near term, we expect our research and development expenses to increase in absolute dollars as we increase our research and development headcount to further strengthen our software and invest in the development of our service.

We will continue to invest in research and development to leverage our large and growing database of acoustic events, which includes those from both gunfire and non-gunfire. We also intend to leverage third-party AI and our own evolving cognitive and analytical applications to improve the efficiency of our solutions. Certain of these applications and outputs may expand the platform of services that we will be able to offer our customers.

General and Administrative

General and administrative expenses primarily consist of personnel-related costs attributable to our executive, finance, and administrative personnel, legal, accounting and other professional services fees, other corporate expenses and allocated overhead.

In the near term, we expect our general and administrative expenses to increase in absolute dollars as we grow our business, support our operations as a public company and increase our headcount.

Other Income (Expense), Net

Other income (expense), net, consisted primarily of interest income and local and franchise tax expenses.

Income Taxes

Our income taxes are based on the amount of our taxable income and enacted federal, state and foreign tax rates, adjusted for allowable credits, deductions and the valuations allowance against deferred tax assets, as applicable.

We continually monitor all positive and negative evidence regarding the realization of our deferred tax assets and may record assets when it becomes more likely than not, that they will be realized, which may impact the expense or benefit from income taxes.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company regularly assesses the likelihood that the deferred tax assets will be recovered from future taxable income. The Company considers projected future taxable income and ongoing tax planning strategies, then records a valuation allowance to reduce the carrying value of the net deferred taxes to an amount that is more likely than not able to be realized. Based upon the Company's assessment of all available evidence, including the previous three years of U.S. based taxable income and loss after permanent items, estimates of future profitability, and the Company's overall prospects of future business, the Company determined that it is more likely than not that the Company will not be able to realize a portion of the deferred tax assets in the future. The Company will continue to assess the potential realization of deferred tax assets on an annual basis, or an interim basis if circumstances warrant. If the Company's actual results and updated projections vary significantly from the projections used as a basis for this determination, the Company may need to change the valuation allowance against the gross deferred tax assets.

Results of Operations

Comparison of Three Months Ended March 31, 2021 and 2020

The following table sets forth our selected condensed consolidated statements of operations data for the three months ended March 31, 2021 and 2020 (in thousands):

	2021	Three Months Ended March 31,		As a % of Revenues	Change	2020	As a % of Revenues	Change
		As a % of Revenues	2020					
Revenues	\$ 15,013	100 %	\$ 10,458	100 %	\$ 4,555	44 %		
Costs								
Cost of revenues	6,300	42 %	4,342	42 %	1,958	45 %		
Impairment of property and equipment	25	—	—	—	25	—		
Total costs	6,325	42 %	4,342	42 %	1,983	46 %		
Gross profit	8,688	58 %	6,116	58 %	2,572	42 %		
Operating expenses:								
Sales and marketing	3,935	27 %	2,516	24 %	1,419	56 %		
Research and development	1,713	11 %	1,352	13 %	361	27 %		
General and administrative	2,871	19 %	2,271	22 %	600	26 %		
Total operating expenses	8,519	57 %	6,139	59 %	2,380	39 %		
Operating income	169	1 %	(23)	—	192	(835 %)		
Other income (expense), net	(41)	—	35	—	(76)	(217 %)		
Provision (benefit) for income taxes	49	—	(1)	—	50	(5,000 %)		
Net income	\$ 79	1 %	\$ 13	—	\$ 66	508 %		

Revenues

The increase of \$4.5 million was primarily attributable to new customers, expansions of existing customer coverage areas and renewals in the first quarter that were delayed from the prior quarter, as well as LEED's revenue contribution, partially offset by a normal rate of customer attrition. We went live in six new Respond cities and five Respond expansions.

Costs

The increase of \$2.0 million was due primarily driven by a \$1.9 million increase in overall personnel-related costs, a \$0.1 million increase in depreciation expense and a \$0.1 million increase in third-party labor. These increases are partially offset by a \$0.1 million decrease in costs related to ShotSpotter Labs projects, for which revenues and costs vary from quarter to quarter depending on the phase of the projects.

Operating Expenses

Sales and Marketing Expense

The increase in sales and marketing expense of \$1.4 million was primarily due to a \$0.6 million increase in personnel costs, and \$0.9 million increase in other costs including commissions expense and amortization of the customer relationship intangible asset related to LEEDS, partially offset by \$0.1 million decrease in travel costs due to limited travel during the COVID-19 pandemic.

Research and Development Expense

The increase in research and development expense of \$0.4 million was primarily due to an increase in personnel and LEEDS related expenses offset by a reduction in outside consulting fees.

General and Administrative Expense

The increase of \$0.6 million was due primarily to a \$0.2 million increase in personnel costs, \$0.2 million increase in acquisition related expenses and \$0.2 million increase in legal and professional fees.

Other Income, Net

The decrease of \$0.08 million was due primarily to a decrease in interest income as the interest rates have significantly decreased over the last year.

Income Taxes

Our income taxes are based on the amount of our taxable income and enacted federal, state and foreign tax rates, adjusted for allowable credits, deductions and the valuations allowance against deferred tax assets, as applicable. For the three months ended March 31, 2021 and 2020, as a result of net operating loss carryforwards, our recorded income taxes consisted of foreign taxes only.

Liquidity and Capital Resources

Sources of Funds

Our operations have been financed primarily through net proceeds from the sale of equity, debt financing arrangements and cash from operating activities. Our principal source of liquidity is cash and cash equivalents totaling \$10.9 million as of March 31, 2021. In August 2020, we entered into an amendment to our credit facility to increase the size of our available loan facility from \$10.0 million to \$20.0 million. As of March 31, 2021, no amounts were outstanding.

We believe our existing cash and cash equivalent balances, our available credit facility and cash flow from operations will be sufficient to meet our working capital and capital expenditure requirements for at least the next 12 months. Our future capital requirements may vary materially from those currently planned and will depend on many factors, including our rate of revenue growth, the timing and extent of spending on sales and marketing, the expansion of sales and marketing activities, the timing of new product introductions, market acceptance of our products and overall economic conditions. We may also seek additional capital to fund our operations, including through the sale of equity or debt financings. To the extent that we raise additional capital through the future sale of equity, the ownership interest of our stockholders will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect the rights of our existing common stockholders. The incurrence of debt financing would result in debt service obligations and the instruments governing such debt could provide for operating and financing covenants that would restrict our operations. Additionally, there is no guarantee debt or equity financing will be available to the Company.

Use of Funds

Our historical uses of cash have primarily consisted of cash used for operating activities, such as expansion of our sales and marketing operations, research and development activities and other working capital needs, and cash used in investing activities, such as property and equipment expenditures to install infrastructure in customer cities in order to deliver our solutions. We also invest in company and technology acquisitions, where appropriate.

Stock Repurchase Program

In May 2019, we announced that our board of directors had approved a stock repurchase program for up to \$15 million of our common stock. The shares may be repurchased from time to time in open market transactions, in privately negotiated transactions or by other methods in accordance with federal securities laws. The actual timing, number and value of shares repurchased under the program will be determined by management in its discretion and will depend on a number of factors, including the market price of our common stock, general market and economic conditions and applicable legal requirements. The stock repurchase program does not obligate us to purchase any particular amount of common stock and may be suspended or discontinued at any time.

During the three months ended March 31, 2021, the Company repurchased 56,162 shares of its common stock at an average price of \$39.02 per share for \$2.2 million. The repurchases were made in open market transactions using cash on hand, and all of the shares repurchased were retired. At March 31, 2021, \$4.5 million remained available for repurchase under the Company's stock repurchase program.

Cash Flows

Comparison of Three Months Ended March 31, 2021 and 2020

The following table presents a summary of our cash flows for the three months ended March 31, 2021 and 2020:

	Three Months Ended March 31,	
	2021	2020
	(in thousands)	
Net cash provided by (used in):		
Operating activities	\$ (1,496)	\$ 5,726
Investing activities	(1,231)	(1,141)
Financing activities	(2,374)	(289)
Net change in cash and cash equivalents	<u>\$ (5,101)</u>	<u>\$ 4,296</u>

Operating Activities

Our net income and cash flows provided by operating activities are significantly influenced by our increase in headcount to support our growth, increase in legal, outside services fees, and sales and marketing expenses, and our ability to bill and collect in a timely manner.

Net cash provided by operating activities decreased \$7.2 million from the three months ended March 31, 2020 to the three months ended March 31, 2021, primarily due to a \$3.9 million decrease in cash collected from customers and a \$2.6 million increase in personnel cost, which includes new personnel costs related to the LEEDS acquisition.

Investing Activities

Our investing activities consist primarily of capital expenditures to install our solutions in customer coverage areas, purchases of property and equipment, and investment in intangible assets.

Investing activities used \$1.2 million and \$1.1 million in the three months ended March 31, 2021 and 2020, respectively, primarily for property and equipment installed for our solutions in customer coverage areas.

Financing Activities

Cash generated by financing activities includes net proceeds from the exercise of stock options and warrants, proceeds from the employee stock purchase plan, offset by payment for repurchases of our common stock, payment of indebtedness, and debt issuance and financing costs.

Financing activities used \$2.4 million in cash during the three months ended March 31, 2021. This was primarily driven by \$2.2 million in payments for repurchases of our common stock and \$0.4 million in payments for HunchLab's contingent consideration, offset by \$0.2 million in proceeds from the exercise of options and warrants.

Financing activities used \$0.3 million in cash during the three months ended March 31, 2020. This was primarily driven by \$0.3 million in payments for HunchLab's contingent consideration.

Off-Balance Sheet Arrangements

At March 31, 2021, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities that were established for the purpose of facilitating off-balance sheet arrangements. We do not engage in off-balance sheet financing arrangements. In addition, we do not engage in trading activities involving non-exchange traded contracts.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles. The preparation of our consolidated financial statements requires us to make estimates, assumptions and judgments that affect the reported amounts of revenues, assets, liabilities, costs and expenses. We base our estimates and assumptions on historical experience and other factors that we believe to be reasonable under the circumstances. We evaluate our estimates and assumptions on an ongoing basis. Our actual results may differ from these estimates.

For the significant or material changes in our critical accounting policies during the three months ended March 31, 2021, see Note 2, *Summary of Significant Accounting Policies*, to the notes of our condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

Recently Issued Accounting Pronouncements

See Note 2, *Summary of Significant Accounting Policies*, to the notes to our condensed consolidated financial statements included in this Quarterly Report on Form 10-Q for a summary of recently issued accounting pronouncements.

Item 3. Qualitative and Quantitative Disclosures about Market Risk

Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily the result of fluctuations in interest rates and foreign exchange rates as well as, to a lesser extent, inflation.

There were no material changes in our market risk during the three months ended March 31, 2021, compared to the market risk disclosed in the Qualitative and Quantitative Disclosures about Market Risk section of our 2020 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13-a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that as of March 31, 2021, our disclosure controls and procedures were effective to provide reasonable assurance that the information we are required to file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

In November 2020, we completed the acquisition of LEEDS, LLC ("LEEDS"). We are in the process of integrating internal controls at LEEDS into our control structure. We consider the ongoing integration of LEEDS to represent a material change in our internal control over financial reporting. With the exception of these changes, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the quarter ended March 31, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 1A. RISK FACTORS

Investing in our common stock involves a high degree of risk. You should consider carefully the risks and uncertainties described below, together with all of the other information in this report, including our consolidated financial statements and related notes, before deciding whether to purchase shares of our common stock. If any of the following risks is realized, our business, operating results, financial condition and prospects could be materially and adversely affected. In that event, the price of our common stock could decline, and you could lose part or all of your investment. Moreover, the risks described below are not the only ones that we face. Additional risks not presently known to us or that we currently deem immaterial may also affect our business, operating results, prospects or financial condition. You should carefully consider these risk factors, together with all of the other information included in this Quarterly Report on Form 10-Q as well as our other publicly available filings with the SEC.

SUMMARY OF RISK FACTORS

Investing in our common stock involves risks, including those discussed in the section titled “Risk Factors.” These risks include, among others:

- ⌚ The COVID-19 pandemic has resulted in a material adverse effect on our business, the future magnitude or duration of which we cannot predict with accuracy.
- ⌚ If our business does not grow as we expect, or if we fail to manage our growth effectively, our operating results and business prospects would suffer.
- ⌚ Our quarterly results of operations may fluctuate significantly due to a wide range of factors, which makes our future results difficult to predict.
- ⌚ Because we generally recognize our subscription revenues ratably over the term of our contract with a customer, fluctuations in sales will not be fully reflected in our operating results until future periods.
- ⌚ We have not been profitable historically and may not achieve or maintain profitability in the future.
- ⌚ We may require additional capital to fund our business and support our growth, and our inability to generate and obtain such capital on acceptable terms, or at all, could harm our business, operating results, financial condition and prospects.
- ⌚ Interruptions or delays in service from our third-party providers could impair our ability to make our solutions available to our customers, resulting in customer dissatisfaction, damage to our reputation, loss of customers, limited growth and reduction in revenues.
- ⌚ If we are unable to sell our solutions into new markets, our revenues may not grow.
- ⌚ Ongoing social unrest may result in a material adverse effect on our business, the future magnitude or duration of which we cannot predict with accuracy.
- ⌚ Our success depends on maintaining and increasing our sales, which depends on factors we cannot control, including the availability of funding to our customers.
- ⌚ Contracting with government entities can be complex, expensive, and time-consuming.
- ⌚ If we are unable to further penetrate the public safety market, our revenues may not grow.
- ⌚ Our sales cycle can be lengthy, time-consuming and costly, and our inability to successfully complete sales could harm our business.
- ⌚ Changes in the availability of federal funding to support local law enforcement efforts could impact our business.
- ⌚ The failure of our solutions to meet our customers’ expectations could harm our reputation, which may have a material adverse effect on our business, operating results and financial condition.
- ⌚ Real or perceived false positive gunshot alerts or failure or perceived failure to generate alerts for actual gunfire could adversely affect our customers and their operations, damage our brand and reputation and adversely affect our growth prospects and results of operations.
- ⌚ Economic uncertainties or downturns, or political changes, could limit the availability of funds available to our customers and potential customers, which could materially adversely affect our business.
- ⌚ The nature of our business exposes us to inherent liability risks.

⌚ As a result of our use of outdoor acoustic sensors, we are subject to governmental regulation and other legal obligations, particularly related to privacy, data protection and information security, and our actual or perceived failure to comply with such obligations could harm our business. Compliance with such laws could impair our efforts to maintain and expand our customer base, and thereby decrease our revenues.

⌚ Failure to protect our intellectual property rights could adversely affect our business.

Risks Related to the COVID-19 Pandemic

The COVID-19 pandemic has resulted in a material adverse effect on our business, the future magnitude or duration of which we cannot predict with accuracy.

The COVID-19 pandemic has resulted in a substantial curtailment of business activities worldwide and is causing weakened economic conditions, both in the United States and many countries abroad. As part of intensifying efforts to contain the spread of COVID-19, many companies and state, local and foreign governments have imposed restrictions, including shelter-in-place orders and travel bans. While some of these companies and jurisdictions have started to relax such restrictions, in some cases, the restrictions were put back in place shortly after having been lifted. These factors have negatively impacted our operations and results of operations for the year ended 2020. We expect that the evolving COVID-19 pandemic, associated travel restrictions and social distancing requirements will continue to have an adverse impact on our results of operations. While the ultimate economic impact of the COVID-19 pandemic is highly uncertain, we expect that our business and results of operations, including our revenues, earnings and cash flows from operations, will be adversely impacted for at least the first half of 2021, including as a result of:

- ⌚ Delays in our ability to deploy new “go-live” miles attributable to company policies or customer policies designed to protect employee health and comply with government restrictions;
- ⌚ Greater funding challenges for our customer base, which may adversely affect customer contract renewals, expansion of existing customer deployments or new customer sales;
- ⌚ Possible disruption to our supply chain caused by distribution and other logistical issues, which may further delay our ability to deploy new go-live miles; and
- ⌚ Potential decrease in productivity of our employees or that of our customers or suppliers due to travel bans or restrictions, work-from-home or shelter-in-place policies and orders.

It is currently not possible to predict the magnitude or duration of the COVID-19 pandemic’s impact on our business. The extent to which the COVID-19 pandemic impacts our business will depend on numerous evolving factors that we may not be able to control or accurately predict, including without limitation:

- ⌚ the duration and scope of the pandemic;
- ⌚ governmental, business and individuals’ actions that have been and continue to be taken in response to the pandemic;
- ⌚ the impact of the pandemic on economic activity and actions taken in response;
- ⌚ the effect on our customers and demand for our products and services;
- ⌚ our ability to continue to sell our products and services, including as a result of travel restrictions and people working from home, or restrictions on access to our potential customers;
- ⌚ the ability of our customers to pay for its products and services;
- ⌚ any closures of our facilities and the facilities of our customers and suppliers; and
- ⌚ the degree to which our employees or those of our customers or suppliers become ill with COVID-19.

Risks Related to Our Growth

If our business does not grow as we expect, or if we fail to manage our growth effectively, our operating results and business prospects would suffer.

Our ability to successfully grow our business depends on a number of factors including our ability to:

- ① accelerate our acquisition of new customers;
- ① further sell expansions of coverage areas to our existing customers;
- ① expand our international footprint;
- ① expand into new vertical markets, such as precision policing, and security solutions;
- ① increase awareness of the benefits that our solutions offer;
- ① maintain our competitive and technology leadership position; and
- ① manage our business successfully through the COVID-19 pandemic and any resulting impact on economic conditions, including conditions impacting the availability of funding for our public safety solution.

As usage of our solutions grows, we will need to continue to make investments to develop and implement new or updated solutions, technologies, security features and cloud-based infrastructure operations. In addition, we will need to appropriately scale our internal business systems and our services organization, including the suppliers of our detection equipment and customer support services, to serve our growing customer base. Any failure of, or delay in, these efforts could impair the performance of our solutions and reduce customer satisfaction.

Further, our growth could increase quickly and place a strain on our managerial, operational, financial and other resources, and our future operating results depend to a large extent on our ability to successfully manage our anticipated expansion and growth. To manage our growth successfully, we will need to continue to invest in sales and marketing, research and development, and general and administrative functions and other areas. We are likely to recognize the costs associated with these investments earlier than receiving some of the anticipated benefits, and the return on these investments may be lower, or may develop more slowly, than we expect, which could adversely affect our operating results.

If we are unable to manage our growth effectively, we may not be able to take advantage of market opportunities or develop new solutions or upgrades to our existing solutions, satisfy customer requirements, maintain the quality and security of our solutions or execute on our business plan, any of which could have a material adverse effect on our business, operating results and financial condition.

Our quarterly results of operations may fluctuate significantly due to a wide range of factors, which makes our future results difficult to predict.

Our revenues and results of operations could vary significantly from quarter to quarter as a result of various factors, many of which are outside of our control, including:

- ① the expansion or contraction of our customer base;
- ① the renewal or nonrenewal of subscription agreements with, and expansion of coverage areas by, existing customers;
- ① the size, timing, terms and deployment schedules of our sales to both existing and new customers;

- ① the introduction of products or services that may compete with us for the limited funds available to our customers, and changes in the cost of such products or services;
- ① changes in our customers' and potential customers' budgets;
- ① our ability to control costs, including our operating expenses;
- ① our ability to hire, train and maintain our direct sales force;
- ① the timing of satisfying revenues recognition criteria in connection with initial deployment and renewals;
- ① fluctuations in our effective tax rate;
- ① the impact of the COVID-19 pandemic on business operations and economic conditions; and
- ① general economic and political conditions, both domestically and internationally.

Any one of these or other factors discussed elsewhere in this report may result in fluctuations in our revenues and operating results, meaning that quarter-to-quarter comparisons of our revenues, results of operations and cash flows may not necessarily be indicative of our future performance.

Because of the fluctuations described above, our ability to forecast revenues is limited and we may not be able to accurately predict our future revenues or results of operations. In addition, we base our current and future expense levels on our operating plans and sales forecasts, and our operating expenses are expected to increase in the short term. Accordingly, we may not be able to reduce our costs sufficiently to compensate for an unexpected shortfall in revenues, and even a small shortfall in revenues could disproportionately and adversely affect our financial results for that quarter. The variability and unpredictability of these and other factors could result in our failing to meet or exceed financial expectations for a given period.

Because we generally recognize our subscription revenues ratably over the term of our contract with a customer, fluctuations in sales will not be fully reflected in our operating results until future periods.

Our revenues are primarily generated from subscriptions to our solutions. With the exception of a small number of legacy customers, our customers do not have the right to take possession of our equipment or software platform. Revenues from subscriptions to our software platform is recognized ratably over the subscription period beginning on the date that the subscription is made available to the customer, which we refer to as the "go-live" date. Our agreements with our customers typically range from one to five years. As a result, much of the revenues that we report in each quarter are attributable to agreements entered into during previous quarters. Consequently, a decline in sales, customer renewals or market acceptance of our solutions in any one quarter would not necessarily be fully reflected in the revenues in that quarter and would negatively affect our revenues and profitability in future quarters. This ratable revenues recognition also makes it difficult for us to rapidly increase our revenues through additional sales in any period, as revenues from new customers generally are recognized over the applicable agreement term. Our subscription-based approach may result in uneven recognition of revenues.

We recognize subscription revenues over the term of a subscription agreement. Once we enter into a contract with a customer, there is a delay until we begin recognizing revenues while we survey the coverage areas, obtain any required consents for installation, and install our sensors, which together can take up to several months or more. We begin recognizing revenues from a sale only when all of these steps are complete and the solution is live.

While most of our customers elect to renew their subscription agreements following the expiration of a term, in some cases, they may not be able to obtain the proper approvals or funding to complete the renewal prior to such expiration. For these customers, we stop recognizing subscription revenues at the end of the current term, even though we may continue to provide services for a period of time while the renewal process is completed. Once the renewal is complete, we then recognize subscription revenues for the period between the expiration of the term of the agreement and the completion of the renewal process.

The variation in the timeline for deploying our solutions and completing renewals may result in fluctuations in our revenues, which could cause our results to differ from projections. Additionally, while we generally invoice for 50% of the contract cost upon a customer's go-live date, our cash flows may be volatile and will not match our revenues recognition.

We have not been profitable historically and may not achieve or maintain profitability in the future.

We only reached our first full year of net income in 2019; prior to that, we posted a net loss in each year since inception. As of March 31, 2021 we had an accumulated deficit of \$94.3 million. We are not certain whether we will be able to maintain enough revenues from sales of our solutions to sustain or increase our growth or maintain profitability in the future. We also expect our costs to increase in future periods, which could negatively affect our future operating results if our revenues do not increase. In particular, we expect to continue to expend substantial financial and other resources on:

- ① sales and marketing, including a significant expansion of our sales organization, both domestically and internationally;
- ① research and development related to our solutions, including investments in our engineering and technical teams;
- ① acquisition of complementary technologies or businesses, such as our acquisition of HunchLab technology in October 2018 and our acquisition of LEEDS, LLC ("LEEDS") in November 2020;
- ① continued international expansion of our business; and
- ① general and administrative expenses.

These investments may not result in increased revenues or growth in our business. If we are unable to increase our revenues at a rate sufficient to offset the expected increase in our costs, our business, operating results and financial position may be harmed, and we may not be able to maintain profitability over the long term. In particular, the COVID-19 pandemic and its impact on economic conditions will make it more difficult for us to increase revenues sufficient to maintain profitability. Additionally, we may encounter unforeseen operating expenses, difficulties, complications, delays and other unknown factors that may result in losses in future periods. If our revenue growth does not meet our expectations in future periods, our financial performance may be harmed, and we may not maintain profitability in the future.

We may require additional capital to fund our business and support our growth, and our inability to generate and obtain such capital on acceptable terms, or at all, could harm our business, operating results, financial condition and prospects.

We intend to continue to make substantial investments to fund our business and support our growth. In addition, we may require additional funds to respond to business challenges, including the need to develop new features or enhance our solutions, improve our operating infrastructure or acquire or develop complementary businesses and technologies. As a result, in addition to the revenues we generate from our business and our existing cash balances, we may need to engage in additional equity or debt financings to provide the funds required for these and other business endeavors. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. Any debt financing that we may secure in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. We may not be able to obtain such additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business may be adversely affected. In addition, our inability to generate or obtain the financial resources needed may require us to delay, scale back, or eliminate some or all of our operations, which may have a material adverse effect on our business, operating results, financial condition and prospects.

Risks Related to Our Public Safety Business

Ongoing social unrest may result in a material adverse effect on our business, the future magnitude or duration of which we cannot predict with accuracy.

We may be adversely affected by ongoing social unrest, protests against racial inequality, protests against police brutality and movements such as “Defund the Police” or increases in such unrest that may occur in the future. These events may directly or indirectly affect police agency budgets and funding available to current and potential customers. Participants in these events may also attempt to create the perception that our solutions are contributing to the “problem”, which may adversely affect the Company, its business and results of operations, including its revenues, earnings and cash flows from operations.

Our success depends on maintaining and increasing our sales, which depends on factors we cannot control, including the availability of funding to our customers.

To date, substantially all of our revenues have been derived from contracts with local governments and their agencies, in particular the police departments of major cities in the United States. To a lesser extent, we also generate revenues from federal agencies, foreign governments and higher education institutions. We believe that the success and growth of our business will continue to depend on our ability to add new police departments and other government agencies, domestically and internationally, as customers of our public safety solution and new universities, corporate campuses and key infrastructure and transportation centers as customers of our security solutions. Many of our target customers have restricted budgets, such that we are forced to compete with programs or solutions that offer an alternative use of the same funds. A number of factors could cause current and/or potential customers to: delay or refrain from purchasing our solutions, prevent expansion of, or reduce coverage areas and/ or terminate use of our solutions, including:

- ① decreases or changes in available funding, including tax revenues, budgetary allocations, government grants and other government funding programs;
- ① potential delays or changes in appropriations or other funding authorization processes;
- ① changes in fiscal or contracting policies;
- ① macro-and/or local economic changes that may affect customer funding;
- ① changes in elected or appointed officials; and
- ① changes in laws or public sentiment regarding privacy or surveillance.

The COVID-19 pandemic and any associated impact on economic conditions could also cause or exacerbate any of the foregoing. The occurrence of any of the foregoing would impede or delay our ability to maintain or increase the amount of revenues derived from these customers, which could have a material adverse effect on our business, operating results and financial condition.

Contracting with government entities can be complex, expensive, and time-consuming.

The procurement process for government entities is in many ways more challenging than contracting in the private sector. We must comply with laws and regulations relating to the formation, administration, performance and pricing of contracts with government entities, including U.S. federal, state and local governmental bodies. These laws and regulations may impose added costs on our business or prolong or complicate our sales efforts, and failure to comply with these laws and regulations or other applicable requirements could lead to claims for damages from our customers, penalties, termination of contracts and other adverse consequences. Any such damages, penalties, disruptions or limitations in our ability to do business with government entities could have a material adverse effect on our business, operating results and financial condition.

Government entities often require highly specialized contract terms that may differ from our standard arrangements. For example, if the federal government provides grants to certain state and local governments for our solutions, and such governments do not continue to receive these grants, then these customers have the ability to terminate their contracts with

us without penalty. Government entities often impose compliance requirements that are complicated, require preferential pricing or “most favored nation” terms and conditions, or are otherwise time-consuming and expensive to satisfy. Compliance with these special standards or satisfaction of such requirements could complicate our efforts to obtain business or increase the cost of doing so. Even if we do meet these special standards or requirements, the increased costs associated with providing our solutions to government customers could harm our margins. Additionally, even once we have secured a government contract, the renewal process can be lengthy and as time-consuming as the initial sale, and we may be providing our service for months past the contract expiration date without certainty if the renewal agreement will be signed or not. During the COVID-19 pandemic and any associated impact on economic conditions, these risks are more pronounced than usual, as government entities struggle with reduced levels of resources related to implications of the pandemic.

Changes in the underlying regulatory conditions, political landscape or required procurement procedures that affect these types of customers could be introduced prior to the completion of our sales cycle, making it more difficult or costly to finalize a contract with a new customer or expand or renew an existing customer relationship. For example, customers may require a competitive bidding process with extended response deadlines, review or appeal periods, or customer attention may be diverted to other government matters, postponing the consideration of the purchase of our products. Such delays could harm our ability to provide our solutions efficiently and to grow or maintain our customer base.

If we are unable to further penetrate the public safety market, our revenues may not grow.

Our ability to increase revenues will depend in large part on our ability to sell our current and future public safety solutions. For example, our ability to have our ShotSpotter Respond customers renew their annual subscriptions and expand their mileage coverage or purchasing and implementing our new products such as ShotSpotter Connect and ultimately ShotSpotter Investigate drives our ability to increase our revenues. Most of our ShotSpotter Respond customers begin using our solution in a limited coverage area. Our experience has been, and we expect will continue to be, that after the initial implementation of our solutions, our new customers typically renew their annual subscriptions, and many also choose to expand their coverage area. If our existing customers do not renew their subscriptions, our revenues may decrease. However, some customers may choose to not renew or reduce their coverage. If existing customers do not choose to renew or expand their coverage areas, our revenues will not grow as we anticipate, or may even decline. During the COVID-19 pandemic and any associated impact on economic conditions, this risk is more pronounced than usual, as our customers’ priorities may change or they may have greater uncertainty regarding the availability of funding for our solutions as a result.

Our ability to further penetrate the market for our public safety solutions depends on several factors, including: maintaining a high level of customer satisfaction and a strong reputation among law enforcement; increasing the awareness of our ShotSpotter solutions and their benefits; the effectiveness of our marketing programs; the availability of funding to our customers, particularly in challenging economic conditions we anticipate from the COVID-19 pandemic; our ability to launch ShotSpotter Investigate; and the costs of our solutions. Some potential public safety customers may be reluctant or unwilling to use our solution for a number of reasons, including concerns about additional costs, unwillingness to expose or lack of concern regarding the extent of gun violence in their community, uncertainty regarding the reliability and security of cloud-based offerings or lack of awareness of the benefits of our public safety solutions. If we are unsuccessful in expanding the coverage of ShotSpotter solutions by existing public safety customers or adding new customers, our revenues and growth prospects would suffer.

Our sales cycle can be lengthy, time-consuming and costly, and our inability to successfully complete sales could harm our business.

Our sales process involves educating prospective customers and existing customers about the use, technical capabilities and benefits of our solutions. Prospective customers, especially government agencies, often undertake a prolonged evaluation process that may last up to nine months or more and that typically involves comparing the benefits of our solutions to alternative uses of funds. We may spend substantial time, effort and money on our sales and marketing efforts without any assurance that our efforts will produce any sales.

Additionally, events affecting our customers’ budgets or missions may occur during the sales cycle that could negatively impact the size or timing of a purchase after we have invested substantial time, effort and resources into a potential sale, contributing to more unpredictability in the growth of our business. If we are unable to succeed in closing sales with new and existing customers, our business, operating results and financial condition will be harmed. During the

COVID-19 pandemic and any associated impact on economic conditions, this risk is more pronounced than usual, as our customers' priorities may change or they may have greater uncertainty regarding the availability of funding for our solutions as a result.

Changes in the availability of federal funding to support local law enforcement efforts could impact our business.

Many of our customers rely to some extent on funds from the U.S. federal government in order to purchase and pay for our solutions. Any reduction in federal funding for local law enforcement efforts could result in our customers having less access to funds required to continue, renew, expand or pay for our solutions. Increasing social unrest, protests against racial inequality, protests against police brutality and movements such as "Defund the Police" increased during 2020. These events may directly or indirectly affect municipal and police agency budgets, including federal funding available to current and potential customers. If federal funding is reduced or eliminated and our customers cannot find alternative sources of funding to purchase our solutions, our business will be harmed.

Federal stimulus funding as a result of the COVID-19 pandemic does exist; however, we do not know whether this funding will be made available to our existing or potential customers, and many state and local governments anticipate budget shortfalls without additional funding. Further, the allocation of and prioritization of stimulus funds is uncertain and may change. There is no guarantee that additional funding will be made available to fund our solutions.

Real or perceived false positive gunshot alerts or failure or perceived failure to generate alerts for actual gunfire could adversely affect our customers and their operations, damage our brand and reputation and adversely affect our growth prospects and results of operations.

A false positive alert, in which a non-gunfire incident is reported as gunfire, could result in an unnecessary rapid deployment of police officers and first responders, which may raise unnecessary fear among the occupants of a community or facility, and may be deemed a waste of police and first responder resources. A failure to alert law enforcement or security personnel of actual gunfire (false negative) could result in a less rapid or no response by police officers and first responders, increasing the probability of injury or loss of life. Both false positive alerts and the failure to generate alerts of actual gunfire (false negative) may result in customer dissatisfaction, potential loss of confidence in our solutions, and potential liabilities to customers or other third parties, any of which could harm our reputation and adversely impact our business and operating results. Additionally, the perception of a false positive alert or of a failure to generate an alert, even where our customers understand that our solutions were utilized correctly, could lead to negative publicity or harm the public perception of our solutions, which could harm our reputation and adversely impact our business and operating results.

Economic uncertainties or downturns, or political changes, could limit the availability of funds available to our customers and potential customers, which could materially adversely affect our business.

Economic uncertainties or downturns could adversely affect our business and operating results. Negative conditions in the general economy both in the United States and abroad, including conditions resulting from changes in gross domestic product growth, financial and credit market fluctuations, political deadlock, natural catastrophes, warfare, terrorist attacks and infectious disease outbreaks, such as COVID-19 pandemic, could cause a decrease in funds available to our customers and potential customers and negatively affect the rate of growth of our business.

These economic conditions may make it extremely difficult for our customers and us to forecast and plan future budgetary decisions or business activities accurately, and they could cause our customers to reevaluate their decisions to purchase our solutions, which could delay and lengthen our sales cycles or result in cancellations of planned purchases. Furthermore, during challenging economic times or as a result of political changes, our customers may tighten their budgets and face constraints in gaining timely access to sufficient funding or other credit, which could result in an impairment of their ability to make timely payments to us. In turn, we may be required to increase our allowance for doubtful accounts, which would adversely affect our financial results.

We cannot predict the timing, strength or duration of any economic slowdown, instability or recovery, generally or within any particular industry, or the impact of political changes. If the economic conditions of the general economy or industries in which we operate worsen from present levels, or if recent political changes result in less funding being available to purchase our solutions, our business, operating results, financial condition and cash flows could be adversely affected.

New competitors may enter the market for our public safety solution.

If cities and other government entities increase their efforts to reduce gun violence or our solutions gain visibility in the market, companies could decide to enter into the public safety solution market and thereby increase the competition we face. In addition to other gunshot detection products, we also compete with other technologies and solutions targeting our public safety customers' resources for law enforcement and crime prevention. Our competitors could benefit from the disclosure of our data or information concerning our techniques and processes due to legal or other obligations (for example, as a result of public-records requests or subpoenas to provide information or to testify in court). Because there are several possible uses for these limited budgetary resources, if we are not able to compete successfully for these limited resources, our business may not grow as we expect, which could adversely impact our revenues and operating results.

The nature of our business may result in undesirable press coverage or other negative publicity.

Our solutions are used to assist law enforcement and first responders in the event that gunfire is detected. Even when our solutions work as intended, the incidents detected by our solutions could lead to injury, loss of life and other negative outcomes, and such events are likely to receive negative publicity. If we fail to detect an incident, or if we detect an incident, such as a terrorist attack or active-shooter event, but the response time of law enforcement or first responders is not sufficiently quick to prevent injury, loss of life, property damage or other adverse outcomes, we may receive negative media attention. At times, our data or information concerning our techniques and processes may become a matter of public record due to legal or other obligations (for example, as a result of public-records requests or subpoenas to provide information or to testify in court), and we may receive negative media attention as a result.

In addition, our solutions require that our customers monitor alerts and respond timely to notifications of gunshots. If our customers do not fully utilize our systems, we may be subject to criticism and unflattering media coverage regarding the effectiveness of our solutions and the cost of our solutions to our customers. Such negative publicity could have an adverse impact on new sales or renewals or expansions of coverage areas by existing customers, which would adversely impact our financial results and future prospects.

Concerns regarding privacy and government-sponsored surveillance may deter customers from purchasing our solutions.

Governmental agencies and private citizens have become increasingly sensitive to real or perceived government or third-party surveillance and may wrongly believe that our outdoor sensors allow customers to listen to private conversations and monitor private citizen activity. Our sensors are not designed for "live listening" and are triggered only at loud impulsive sounds that may likely be gunfire. However, perceived privacy concerns may result in negative media coverage and efforts by private citizens to persuade municipalities, educational institutions or other potential customers not to purchase our precision policing solutions for their communities, campuses or facilities. In addition, laws may exist or be enacted to address such concerns that could impact our ability to deploy our solutions. For example, the City of Toronto, Canada decided against using ShotSpotter solutions because the Ministry of the Attorney General of Ontario indicated that it may compromise Section 8 of Canada's Charter of Rights and Freedoms, which relates to unreasonable search and seizure. If customers choose not to purchase our solutions due to privacy or surveillance concerns, then the market for our solutions may develop more slowly than we expect, or it may not achieve the growth potential we expect, any of which would adversely affect our business and financial results.

Strategic and Operational Risks

If we are unable to sell our solutions into new markets, our revenues may not grow.

Part of our growth strategy depends on our ability to increase sales of our security and public safety solutions in markets outside of the United States. We are focused on expanding the sales of these solutions into new markets, but customers in these new markets may not be receptive or sales may be delayed beyond our expectations, causing our revenue growth and growth prospects to suffer. During the COVID-19 pandemic and any associated impact on economic conditions, this risk is more pronounced than usual.

Our ability to successfully face these challenges depends on several factors, including increasing the awareness of our solutions and their benefits; the effectiveness of our marketing programs; the costs of our solutions; our ability to attract, retain and effectively train sales and marketing personnel; and our ability to develop relationships with communication carriers and other partners. If we are unsuccessful in developing and marketing our solutions into new

markets, new markets for our solutions might not develop or might develop more slowly than we expect, either of which would harm our revenues and growth prospects.

The failure of our solutions to meet our customers' expectations could harm our reputation, which may have a material adverse effect on our business, operating results and financial condition.

Promoting and demonstrating the utility of our solutions as useful, reliable and important tools for law enforcement and security personnel is critical to the success of our business. Our ability to secure customer renewals, expand existing customer coverage areas, and enter into new customer contracts is dependent on our reputation and our ability to deliver our solutions effectively. We believe that our reputation among police departments using ShotSpotter solutions is particularly important to our success. Our ability to meet customer expectations will depend on a wide range of factors, including:

- ① our ability to continue to offer high-quality, innovative and accurate precision policing solutions;
- ① our ability to maintain continuous gunshot detection monitoring during high outdoor-noise activity periods such as New Year's Day, the Fourth of July and Cinco de Mayo, and Carnival for international deployments;
- ① our ability to maintain high customer satisfaction, including meeting our service level agreements standards;
- ① the perceived value and quality of our solutions;
- ① differences in opinion regarding the metrics that measure the success of our solutions;
- ① our ability to successfully communicate the unique value proposition of our solutions;
- ① our ability to provide high-quality customer support;
- ① any misuse or perceived misuse of our solutions;
- ① interruptions, delays or attacks on our platform;
- ① litigation- or regulation-related developments; and
- ① damage to or degradation of our sensors or sensor network by third parties.

Furthermore, negative publicity, whether or not justified, relating to events or activities attributable to us, our solutions, our employees, our partners or others associated with any of these parties, may tarnish our reputation. Damage to our reputation may reduce demand for our solutions and would likely have a material adverse effect on our business, operating results and financial condition. Moreover, any attempts to rebuild our reputation may be costly and time-consuming, and such efforts may not ultimately be successful.

Interruptions or performance problems associated with our technology and infrastructure may adversely affect our business and results of operations.

We have in the past experienced, and may in the future experience, performance issues due to a variety of factors, including infrastructure changes, human or software errors, intentional or accidental damage to our technology (including sensors), website or third-party hosting disruptions or capacity constraints due to a number of potential causes including technical failures, natural disasters or security attacks. If our security is compromised, our platform is unavailable or our users are unable to receive our alerts or otherwise communicate with our IRC reviewers, within a reasonable amount of time or at all, our business could be negatively affected. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time.

In addition, our IRC department personnel operate either remotely or out of our offices. Any interruption or delay in service from our IRC, such as from a communications or power outage, could limit our ability deliver our solutions. In addition, it may become increasingly difficult to maintain and improve the performance of our solutions, especially during

peak usage times as the capacity of our IRC operations reaches its limits. If there is an interruption or delay in service from our IRC operations and a gunshot is detected but not reviewed in the allotted time, our software will flag the incident for off-line review. This may result in delayed notifications to our customers and as a result, we could experience a decline in customer satisfaction with our solutions and our reputation and growth prospects could be harmed.

We expect to continue to make significant investments to maintain and improve the performance of our solutions. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed and continually develop our technology to accommodate actual and anticipated changes in technology, our business, operating results and financial condition may be adversely affected.

We rely on wireless carriers to provide access to wireless networks through which our acoustic sensors communicate with our cloud-based backend and with which we provide our notification services to customers, and any interruption of such access would impair our business.

We rely on wireless carriers, mainly AT&T and Verizon, to provide access to wireless networks for machine-to-machine data transmissions, which are an integral part of our services. Our wireless carriers may suspend wireless service to expand, maintain or improve their networks. These wireless carriers perform routine maintenance and periodic software and firmware updates that may damage our sensors or make them inoperable. Any suspension or other interruption of services would adversely affect our ability to provide our services to our customers and may adversely affect our reputation. In addition, the terms of our agreements with these wireless carriers provide that either party can cancel or terminate the agreement for convenience. If one of our wireless carriers were to terminate its agreement with us, we would need to source a different wireless carrier and/or modify our equipment during the notice period in order to minimize disruption in the performance of our solutions. Price increases or termination by our wireless carriers or changes to existing contract terms could have a material adverse effect on our business, operating results and financial condition.

Natural disasters, infectious disease outbreaks, power outages or other events impacting us or our customers could harm our operating results and financial condition.

We recognize revenue on a subscription basis as our solutions are provided to our customers over time. If our services are disrupted due to natural disasters, infectious disease outbreaks, power outages or other events that we cannot control, we may not be able to continue providing our solutions as expected. For example, during the COVID-19 pandemic, our employees, including our IRC reviewers, are being required to work remotely, which may negatively impact productivity of our employees and effectiveness of our solutions.

When we stop providing coverage, we also stop recognizing revenues as a result of the affected subscription agreement. If we are forced to discontinue our services due to natural disasters, power outages and other events outside of our control, our revenues may decline, which would negatively impact our results of operations and financial condition. In addition, we may face liability for damages caused by our sensors in the event of heavy weather, hurricanes or other natural disasters. We may also incur additional costs to repair or replace installed sensor networks damaged by heavy weather, hurricanes or other natural disasters.

Any of our facilities or operations may be harmed or rendered inoperable by natural or man-made disasters, including earthquakes, tornadoes, hurricanes, wildfires, floods, nuclear disasters, acts of terrorism or other criminal activities, infectious disease outbreaks, such as COVID-19, and power outages, which may render it difficult or impossible for us to operate our business for some period of time or decrease productivity. For example, our primary IRC and a data center that hosts some of our customer services are located in the San Francisco Bay Area, a region known for seismic activity. Our facilities would likely be costly to repair or replace, and any such efforts would likely require substantial time. In addition, like many companies, we have recently implemented a work from home policy as a result of the COVID-19 pandemic. This policy may negatively impact productivity of our employees.

Any disruptions in our operations could negatively impact our business and operating results and harm our reputation. In addition, we may not carry business insurance or may not carry sufficient business insurance to compensate for losses that may occur. Any such losses or damages could have a material adverse effect on our business, operating results and financial condition. In addition, the facilities of significant vendors, including the manufacturer of our proprietary acoustic sensor, may be harmed or rendered inoperable by such natural or man-made disasters, which may cause disruptions, difficulties or material adverse effects on our business.

The incurrence of debt may impact our financial position and subject us to additional financial and operating restrictions.

On September 27, 2018, we entered into a senior secured revolving credit facility with Umpqua Bank (the “Umpqua Credit Agreement”), which we increased to \$20.0 million in August 2020 and which we intend to use for general working capital purposes. As of March 31, 2021, we had no outstanding amounts due on nor any usage of the Umpqua Credit Agreement.

Under the Umpqua Credit Agreement, we are subject to various negative covenants that limit, subject to certain exclusions, our ability to incur indebtedness, make loans, invest in or secure the obligations of other parties, pay or declare dividends, make distributions with respect to our securities, redeem outstanding shares of our stock, create subsidiaries, materially change the nature of its business, enter into related party transactions, engage in mergers and business combinations, the acquisition or transfer of our assets outside of the ordinary course of business, grant liens or enter into collateral relationships involving company assets or reincorporate, reorganize or dissolve the company. These covenants could adversely affect our financial health and business and future operations by, among other things:

- ⌚ making it more difficult to satisfy our obligations, including under the terms of the Umpqua Credit Agreement;
- ⌚ limiting our ability to refinance our debt on terms acceptable to us or at all;
- ⌚ limiting our flexibility to plan for and adjust to changing business and market conditions and increasing our vulnerability;
- ⌚ limiting our ability to use our available cash flow to fund future acquisitions, working capital, business activities, and other general corporate requirements; and
- ⌚ limiting our ability to obtain additional financing for working capital to fund growth or for general corporate purposes, even when necessary to maintain adequate liquidity.

We are also required to maintain certain financial covenants tied to our leverage, interest charges and profitability. Our ability to meet such covenants (those negative covenants discussed in the preceding paragraph) or other restrictions can be affected by events beyond our control, and our failure to comply with the financial and other covenants would be an event of default under the Umpqua Credit Agreement. If an event of default under the Umpqua Credit Agreement, has occurred and is continuing, the outstanding borrowings thereunder could become immediately due and payable, and we would then be required to cash collateralize any letters of credit then outstanding, and the lender could refuse to permit additional borrowings under the facility. We cannot assure you that we would have sufficient assets to repay those borrowings and, if we are unable to repay those amounts, the lender could proceed against the collateral granted to them to secure such indebtedness. We have pledged substantially all of our assets as collateral, and an event of default would likely have a material adverse effect on our business.

The competitive landscape for our security solutions is evolving.

The market for security solutions for university campuses, corporate campuses and transportation and key infrastructure centers includes a number of available options, such as video surveillance and increased human security presence. Because there are several possible uses of funds for security needs, we may face increased challenges in demonstrating or distinguishing the benefits of ShotSpotter SecureCampus and ShotSpotter SiteSecure. In particular, while we have seen growing interest in our security solutions, interest in the indoor gunshot detection offering was limited, and as a result, in June 2018, we made the strategic decision to cease indoor coverage as part of our service offering.

Failure to effectively develop and expand our sales and marketing capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our solutions.

To increase total customers and customer coverage areas and to achieve broader market acceptance of our solutions, we will need to expand our sales and marketing organization and increase our business development resources, including the vertical and geographic distribution of our sales force and our teams of account executives focused on new accounts and responsible for renewal and growth of existing accounts.

Our business requires that our sales personnel have particular expertise and experience in working with law enforcement agencies, other government organizations and higher education institutions. We may not achieve revenue growth from expanding our sales force if we are unable to hire, develop and retain talented sales personnel with appropriate experience, if our new sales personnel are unable to achieve desired productivity levels in a reasonable period of time or if our sales and marketing programs are not effective.

During the COVID-19 pandemic, this risk is more pronounced than usual, as our sales and marketing organization has been unable to travel and meetings with our current and potential customers have been more difficult to conduct.

Our strategy includes pursuing acquisitions, and our inability to successfully integrate newly-acquired technologies, assets or businesses may harm our financial results. Future acquisitions of technologies, assets or businesses, which are paid for partially or entirely through the issuance of stock or stock rights, could dilute the ownership of our existing stockholders.

We acquired LEEDS in November 2020 in order to enhance our precision policing platform. We will continue to evaluate and consider potential strategic transactions, including acquisitions of, or investments in, businesses, technologies, services, products and other assets in the future. We also may enter into relationships with other businesses to expand our platform and applications, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing or investments in other companies.

We believe that part of our continued growth will be driven by acquisitions of other companies or their technologies, assets, businesses and teams. Acquisitions in the future that we complete will give rise to risks, including:

- ① incurring higher than anticipated capital expenditures and operating expenses;
- ① failing to assimilate the operations and personnel or failing to retain the key personnel of the acquired company or business;
- ① failing to integrate the acquired technologies, or incurring significant expense to integrate acquired technologies, into our platform and applications;
- ① disrupting our ongoing business;
- ① diverting our management's attention and other company resources;
- ① failing to maintain uniform standards, controls and policies;
- ① incurring significant accounting charges;
- ① impairing relationships with our customers and employees;
- ① finding that the acquired technology, asset or business does not further our business strategy, that we overpaid for the technology, asset or business or that we may be required to write off acquired assets or investments partially or entirely;
- ① failing to realize the expected synergies of the transaction;
- ① being exposed to unforeseen liabilities and contingencies that were not identified prior to acquiring the company; and
- ① being unable to generate sufficient revenues and profits from acquisitions to offset the associated acquisition costs.

Fully integrating an acquired technology, asset or business into our operations may take a significant amount of time. We may not be successful in overcoming these risks or any other problems encountered with the acquisition of and integration of LEEDS or any future acquisitions. To the extent that we do not successfully avoid or overcome the risks or

problems related to any such acquisitions, our results of operations and financial condition could be harmed. Acquisitions also could impact our financial position and capital requirements or could cause fluctuations in our quarterly and annual results of operations. Acquisitions could include significant goodwill and intangible assets, which may result in future impairment charges that would reduce our stated earnings. We may incur significant costs in our efforts to engage in strategic transactions and these expenditures may not result in successful acquisitions.

We expect that the consideration we might pay for any future acquisitions of technologies, assets, businesses or teams could include stock, rights to purchase stock, cash or some combination of the foregoing. If we issue stock or rights to purchase stock in connection with future acquisitions, net income per share and then-existing holders of our common stock may experience dilution.

The nature of our business exposes us to inherent liability risks.

Our gunshot detection solutions are designed to communicate real-time alerts of gunfire incidents to police officers and first responders. Due to the nature of such applications, we are potentially exposed to greater risks of liability for employee acts or omissions or system failures than may be inherent in other businesses. Although substantially all of our customer agreements contain provisions limiting our liability to our customers, we cannot be certain that these limitations will be enforced or that the costs of any litigation related to actual or alleged omissions or failures would not have a material adverse effect on us even if we prevail. Further, certain of our insurance policies and the laws of some states may limit or prohibit insurance coverage for punitive or certain other types of damages or liability arising from gross negligence, or other issues, such as damages caused due to installation of our sensors on buildings owned by third parties, and we cannot assure you that we are adequately insured against the risks that we face.

Real or perceived errors, failures or bugs in our software could adversely affect our operating results and growth prospects.

Because our software is complex, undetected errors, failures or bugs may occur. Our software is often installed and used with different operating systems, system management software, and equipment and networking configurations, which may cause errors or failures of our software or other aspects of the computing environment into which it is deployed. In addition, deployment of our software into computing environments may expose undetected errors, compatibility issues, failures or bugs in our software. Despite our testing, errors, failures or bugs may not be found in our software until it is released to our customers. Moreover, our customers could incorrectly implement or inadvertently misuse our software, which could result in customer dissatisfaction and adversely impact the perceived utility of our products as well as our brand. Any of these real or perceived errors, compatibility issues, failures or bugs in our software could result in negative publicity, reputational harm, loss of or delay in market acceptance of our software, loss of competitive position or claims by customers for losses sustained by them. In any such event, we may be required, or may choose, for customer relations or other reasons, to expend additional resources in order to correct the problem. Alleviating any of these problems could require significant expenditures of our capital and other resources and could cause interruptions or delays in the use of our solutions, which could cause us to lose existing or potential customers and could adversely affect our operating results and growth prospects.

Interruptions or delays in service from our third-party providers could impair our ability to make our solutions available to our customers, resulting in customer dissatisfaction, damage to our reputation, loss of customers, limited growth and reduction in revenues.

We currently use third-party data center hosting facilities to host certain components of our solutions. Our operations depend, in part, on our third-party providers' abilities to protect these facilities against damage or interruption from natural disasters, power or communications failures, cyber incidents, criminal acts and similar events. In the event that any of our third-party facility arrangements is terminated, or if there is a lapse of service or damage to a facility, we could experience service interruptions in our solutions as well as delays and additional expenses in arranging new facilities and services. The COVID-19 pandemic and its associated shelter-in-place orders, travel bans and work-from-home policies may increase the likelihood of service interruptions or cyber incidents at these data center hosting facilities. Any changes in third-party service levels at our data centers or any errors, defects, disruptions, cyber incidents or other performance problems with our solutions could harm our reputation.

Any damage to, or failure of, the systems of the communications providers with whom our data center provider contracts could result in interruptions to our solutions. The occurrence of spikes in usage volume, natural disasters, cyber

incidents, acts of terrorism, vandalism or sabotage, closure of a facility without adequate notice or other unanticipated problems could result in lengthy interruptions in the availability of our services. Problems faced by these network providers, or with the systems by which they allocate capacity among their customers, including us, could adversely affect the experience of our customers. The COVID-19 pandemic and its associated shelter-in-place orders, travel bans and work-from-home policies may increase the likelihood of these problems with such network providers and their capacity allocation systems. Interruptions in our services might cause us to issue refunds to customers and subject us to potential liability.

Further, our insurance policies may not adequately compensate us for any losses that we may incur in the event of damage or interruption, and therefore the occurrence of any of the foregoing could subject us to liability, cause us to issue credits to customers or cause customers not to renew their subscriptions for our applications, any of which could materially adversely affect our business.

If our security measures or those of our customers or third-party providers are compromised, or if unauthorized access to the data of our customers is otherwise obtained, our solutions may be perceived as not being secure, our customers may be harmed and may curtail or cease their use of our solutions, our reputation may be damaged and we may incur significant liabilities.

Our operations involve the storage and transmission of gunfire incident data, including date, time, address and GPS coordinates, occurring in our customer's coverage area. Our systems read, write, store and transfer information from third parties including criminal justice information. Access to some of this data is contingent on complying with federal and applicable state security policies, which requires background checks, the use of encryption and compliance with other information security policies.

Security incidents, whether as a result of third-party action, employee or customer error, technology impairment or failure, malfeasance or criminal activity, could result in unauthorized access to, or loss or unauthorized disclosure of, data which could result in; inability to obtain approvals to sell our products, litigation expenses or damages, indemnity and other contractual obligations and other possible liabilities, including but not limited to government fines and penalties and mitigation expenses, as well as negative publicity, which could damage our reputation, impair our sales and harm our customers and our business. Cyber incidents and malicious internet-based activity continue to increase generally, and providers of cloud-based services have been targeted. If third parties with whom we work, such as vendors or developers, violate applicable laws or our security policies, such violations may also put our systems and data at risk and could in turn have an adverse effect on our business. In addition, such a violation could expose sensitive data including; criminal justice information, and other data we are contractually obliged to keep confidential. The COVID-19 pandemic may increase the likelihood of such cyber incidents. We may be unable to anticipate or prevent techniques used to obtain unauthorized access or to sabotage systems because such techniques change frequently and often are not detected until after an incident has occurred. As we increase our customer base and our brand becomes more widely known and recognized, third parties may increasingly seek to compromise our security controls or gain unauthorized access to customer data or other sensitive information. Further, because of the nature of the services that we provide to our customers, we may be a unique target for attacks.

Many governments have enacted laws requiring companies to notify individuals of data security incidents or unauthorized transfers involving certain types of personal data. In addition, some of our customers contractually require notification of any data security incident. Accordingly, security incidents experienced by our competitors, by our customers or by us may lead to public disclosures, which may lead to widespread negative publicity. Any security compromise in our industry, whether actual or perceived, could harm our reputation, erode customer confidence in the effectiveness of our security measures, negatively impact our ability to attract new customers, cause existing customers to elect not to renew their subscriptions or subject us to third-party lawsuits, regulatory fines or other action or liability, which could materially and adversely affect our business and operating results. Further, the costs of compliance with notification laws and contractual obligations may be significant and any requirement that we provide such notifications as a result of an actual or alleged compromise could have a material and adverse effect on our business.

While we maintain general liability insurance coverage and coverage for errors or omissions, we cannot assure you that such coverage would be adequate or would otherwise protect us from liabilities or damages with respect to claims alleging compromise or loss of data, or that such coverage will continue to be available on acceptable terms or at all.

We rely on the cooperation of customers and third parties to permit us to install our ShotSpotter sensors on their facilities, and failure to obtain these rights could increase our costs or limit the effectiveness of our ShotSpotter Respond solution.

Our ShotSpotter Respond solution requires us to deploy ShotSpotter sensors in our customer coverage areas, which typically entails the installation of approximately 20 to 25 sensors per square mile. The ShotSpotter sensors are mounted on city facilities and third-party buildings, and occasionally on city or utility-owned light poles, and installing the sensors requires the consent of the property owners, which can be time-consuming to obtain and can delay deployment. Generally, we do not pay a site license fee in order to install our sensors, and our contractual agreements with these facility owners provide them the right to revoke permission to use their facility with notice of generally 60 days.

To the extent that required consents delay our ability to deploy our solutions or facility owners do not grant permission to use their facilities, revoke previously granted permissions, or require us to pay a site license fee in order to install our sensors, our business may be harmed. If we were required to pay a site license fee in order to install sensors, our deployment expenses would increase, which would impact our gross margins. If we cannot obtain a sufficient number of sensor mounting locations that are appropriately dispersed in a coverage area, the effectiveness of our ShotSpotter Respond solution would be limited, we may need to reduce the coverage area of the solution. During the COVID-19 pandemic, our installation team has been unable to travel at times. Additionally, both our installation team and our third-party providers are facing greater challenges in obtaining permissions to install and in installing our sensors. To the extent our deployments are delayed for these reasons, we may not be able to meet our service level requirements, any of which could result in customer dissatisfaction or have a material adverse impact on our reputation, our business and our financial results.

If we fail to offer high-quality customer support, our business and reputation may suffer.

We offer customer support 24 hours a day, seven days a week, as well as training on best practices, forensic expertise and expert witness services. Providing these services requires that our personnel have specific experience, knowledge and expertise, making it more difficult for us to hire qualified personnel and to scale up our support operations. The importance of high-quality customer support will increase as we expand our business and pursue new customers. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services or scale our services if our business grows. Increased customer demand for these services, without corresponding revenues, could increase our costs and harm our operating results. If we do not help our customers use applications within our solutions and provide effective ongoing support, our ability to sell additional applications to, or to retain, existing customers may suffer and our reputation with existing or potential customers may be harmed.

Our reliance on wireless carriers will require updates to our technology, and making such updates could result in disruptions in our service or increase our costs of operations.

Approximately 66% of our installed ShotSpotter sensors use fourth-generation Long-Term Evolution (“LTE”) wireless technology and 33% use third-generation (“3G”) cellular communications. Our U.S. wireless carriers have advised us that they will discontinue their 3G services in the future and our ShotSpotter sensors will not be able to transmit on these networks. As a result, we will have to upgrade the sensors that use 3G cellular communications at no additional cost to our customers prior to the discontinuation of 3G services. As our wireless carriers phase out their 3G services or make changes to their spectrum allocation, we may experience reduced service performance, which may require us to replace our 3G sensors sooner than planned. Accelerated bandwidth changes by our carriers may require us to accelerate the upgrade of our 3G sensors prior to the end of 2022, which would accelerate the costs associated with the upgrade. These sensor replacements will require significant capital expenditures, which are estimated to be approximately \$5.0 million in total and may reduce our gross margins and also divert management’s attention and other important resources away from our customer service and sales efforts for new customers.

In the future, we may not be able to successfully implement new technologies or adapt existing technologies to changing market demands. If we are unable to adapt timely to changing technologies, market conditions or customer preferences, our business, operating results and financial condition could be materially and adversely affected.

We rely on a limited number of suppliers and contract manufacturers, and our proprietary ShotSpotter sensors are manufactured by a single contract manufacturer.

We rely on a limited number of suppliers and contract manufacturers. In particular, we use a single manufacturer, with which we have no long-term contract and from which we purchase on a purchase-order basis, to produce our proprietary ShotSpotter sensors. Our reliance on a sole contract manufacturer increases our risks since we do not currently have any alternative or replacement manufacturers, and we do not maintain a high volume of inventory. In the event of an interruption from a contract manufacturer, we may not be able to develop alternate or secondary sources without incurring material additional costs and substantial delays. Furthermore, these risks could materially and adversely affect our business if our contract manufacturer is impacted by a natural disaster or other interruption at a particular location because each of our contract manufacturers produces our products from a single location. Although our contract manufacturer has alternative manufacturing locations, transferring manufacturing to another location may result in significant delays in the availability of our sensors. Also, many standardized components used broadly in our sensors are manufactured in significant quantities in concentrated geographic regions, particularly in Greater China. As a result, protracted regional crises, issues with manufacturing facilities, or the COVID-19 pandemic, could lead to eventual shortages of necessary components. It could be difficult, costly and time consuming to obtain alternative sources for these components, or to change product designs to make use of alternative components. In addition, difficulties in transitioning from an existing supplier to a new supplier could create delays in component availability that would have a significant impact on our ability to fulfill orders for our products.

Many of the key components used to manufacture our proprietary ShotSpotter sensors also come from limited or sole sources of supply. Our contract manufacturer generally purchases these components on our behalf, and we do not have any long-term arrangements with our suppliers. We are therefore subject to the risk of shortages and long lead times in the supply of these components and the risk that suppliers discontinue or modify components used in our products. In addition, the lead times associated with certain components are lengthy and preclude rapid changes in quantities and delivery schedules. Developing alternate sources of supply for these components may be time-consuming, difficult, and costly, and we or our suppliers may not be able to source these components on terms that are acceptable to us, or at all, which may undermine our ability to fill our orders in a timely manner.

If we experience significantly increased demand, or if we need to replace an existing supplier or contract manufacturer, we may be unable to supplement or replace such supply or contract manufacturing on terms that are acceptable to us, which may undermine our ability to deliver our products to customers in a timely manner. For example, for our ShotSpotter sensors, it may take a significant amount of time to identify a contract manufacturer that has the capability and resources to build the sensors to our specifications. Identifying suitable suppliers and contract manufacturers is an extensive process that requires us to become satisfied with their quality control, technical capabilities, responsiveness and service, financial stability, regulatory compliance, and labor and other ethical practices. Accordingly, the loss of any key supplier or contract manufacturer could adversely impact our business, operating results and financial condition.

Our solutions use third-party software and services that may be difficult to replace or cause errors or failures of our solutions that could lead to a loss of customers or harm to our reputation and our operating results.

We license third-party software and depend on services from various third parties for use in our solutions. In the future, such software or services may not be available to us on commercially reasonable terms, or at all. Any loss of the right to use any of the software or services could result in decreased functionality of our solutions until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated, which could harm our business. In addition, any errors or defects in or failures of the third-party software or services could result in errors or defects in our solutions or cause our solutions to fail, which could harm our business and be costly to correct. Many of these providers attempt to impose limitations on their liability for such errors, defects or failures, and if enforceable, we may have additional liability to our customers or third-party providers that could harm our reputation and increase our operating costs.

We will need to maintain our relationships with third-party software and service providers, and obtain from such providers software and services that do not contain any errors or defects. Any failure to do so could adversely impact our ability to deliver effective products to our customers and could harm our operating results.

If we do not or cannot maintain the compatibility of our platform with applications that our customers use, our business could suffer.

Some of our customers choose to integrate our solutions with certain other systems used by our customers, such as real-time LEEDS platforms or computer-aided dispatch systems. The functionality and popularity of our solutions depend, in part, on our ability to integrate our solutions these systems. Providers of these systems may change the features of their technologies, restrict our access to their applications or alter the terms governing use of their applications in an adverse manner. Such changes could functionally limit or terminate our ability to use these technologies in conjunction with our solutions, which could negatively impact our customer service and harm our business. If we fail to integrate our solutions with applications that our customers use, we may not be able to offer the functionality that our customers need, and our customers may not renew their agreements, which would negatively impact our ability to generate revenues and adversely impact our business.

We are in the process of expanding our international operations, which exposes us to significant risks.

We currently operate in limited number of locations outside the United States. A key component to our business strategy is to expand our international operations to increase our revenues from customers outside of the United States as part of our growth strategy. Operating in international markets requires significant resources and management attention and will subject us to regulatory, economic and political risks in addition to those we already face in the United States. In addition, we will need to invest time and resources in understanding the regulatory framework and political environments of our potential customers overseas in order to focus our sales efforts. Because such regulatory and political considerations are likely to vary across jurisdictions, this effort will require additional time and attention from our sales team and could lead to a sales cycle that is longer than our typical process for sales in the United States. We also may need to hire additional employees and otherwise invest in our international operations in order to reach new customers. Because of our limited experience with international operations as well as developing and managing sales in international markets, our international expansion efforts may be delayed or may not be successful.

In addition, we face and will continue to face risks in doing business internationally that could adversely affect our business, including:

- ① the potential impact of currency exchange fluctuations;
- ① the need to comply with local data residency requirements;
- ① the availability and reliability of local data centers and internet bandwidth providers;
- ① the difficulty of staffing and managing international operations and the increased operations, travel, shipping and compliance costs associated with having customers in numerous international locations;
- ① potentially greater difficulty collecting accounts receivable and longer payment cycles;
- ① the availability and cost of coverage by wireless carriers in international markets;
- ① higher or more variable costs associated with wireless carriers and other service providers;
- ① the need to offer customer support in various languages;
- ① challenges in understanding and complying with local laws, regulations and customs in foreign jurisdictions, including laws regarding privacy and government surveillance;
- ① export controls and economic sanctions administered by the Department of Commerce Bureau of Industry and Security and the Treasury Department's Office of Foreign Assets Control;
- ① compliance with various anti-bribery and anti-corruption laws such as the Foreign Corrupt Practices Act and United Kingdom Bribery Act of 2010;

- ⌚ tariffs and other non-tariff barriers, such as quotas and local content rules;
- ⌚ more limited protection for our intellectual property in some countries;
- ⌚ adverse or uncertain tax consequences as a result of international operations;
- ⌚ currency control regulations, which might restrict or prohibit our conversion of other currencies into U.S. dollars;
- ⌚ restrictions on the transfer of funds;
- ⌚ deterioration of political relations between the United States and other countries; and
- ⌚ political or social unrest, global pandemics such as the COVID-19 pandemic or economic instability in a specific country or region in which we operate, which could have an adverse impact on our operations in that location.

Also, we expect that due to costs related to our international expansion efforts and the increased cost of doing business internationally, we will incur higher costs to secure sales to international customers than the comparable costs for domestic customers. As a result, our financial results may fluctuate as we expand our operations and customer base worldwide.

Our failure to manage any of these risks successfully could harm our international operations, and adversely affect our business, operating results and financial condition.

We are dependent on the continued services and performance of our senior management and other key personnel, the loss of any of whom could adversely affect our business.

Our future success depends in large part on the continued contributions of our senior management and other key personnel. In particular, the leadership of key management personnel is critical to the successful management of our company, the development of our products, and our strategic direction. We also depend on the contributions of key technical personnel.

We do not maintain “key person” insurance for any member of our senior management team or any of our other key employees. Our senior management and key personnel are all employed on an at-will basis, which means that they could terminate their employment with us at any time, for any reason and without notice. The loss of any of our key management personnel could significantly delay or prevent the achievement of our development and strategic objectives and adversely affect our business.

If we are unable to attract, integrate and retain additional qualified personnel, including top technical talent, our business could be adversely affected.

Our future success depends in part on our ability to identify, attract, integrate and retain highly skilled technical, managerial, sales and other personnel. We face intense competition for qualified individuals from numerous other companies, including other software and technology companies, many of whom have greater financial and other resources than we do. Some of these characteristics may be more appealing to high-quality candidates than those we have to offer. In addition, new hires often require significant training and, in many cases, take significant time before they achieve full productivity. We may incur significant costs to attract and retain qualified personnel, including significant expenditures related to salaries and benefits and compensation expenses related to equity awards, and we may lose new employees to our competitors or other companies before we realize the benefit of our investment in recruiting and training them. Moreover, new employees, especially those who work from home, may not be or become as productive as we expect, as we may face challenges in adequately or appropriately integrating them into our workforce and culture. If we are unable to attract, integrate and retain suitably qualified individuals who are capable of meeting our growing technical, operational and managerial requirements, on a timely basis or at all, our business will be adversely affected.

Volatility or lack of positive performance in our stock price may also affect our ability to attract and retain our key employees. Many of our senior management personnel and other key employees have become, or will soon become, vested in a substantial amount of stock or stock options. Employees may be more likely to leave us if the shares they own or the shares underlying their vested options have significantly appreciated in value relative to the original purchase prices of the shares or the exercise prices of the options, or, conversely, if the exercise prices of the options that they hold are significantly above the market price of our common stock. If we are unable to appropriately incentivize and retain our employees through equity compensation, or if we need to increase our compensation expenses in order to appropriately incentivize and retain our employees, our business, operating results and financial condition would be adversely affected.

Legal and Regulatory Risks

We and our use of outdoor acoustic sensors, are subject to governmental regulation and other legal obligations, particularly related to privacy, data protection and information security, and our actual or perceived failure to comply with such obligations could harm our business. Compliance with such laws could impair our efforts to maintain and expand our customer base, and thereby decrease our revenues.

Our outdoor sensors are acoustic devices that are designed to recognize impulsive sounds that are likely to be gunfire. ShotSpotter sensors do not use high gain, directional or other specialized microphones, or have the ability to live stream audio. Typically, sounds, noises or voices captured on the secure sensors are cached temporarily but are written over and permanently deleted within 30 hours. When a sensor is triggered by an impulsive sound, it creates a potential gunshot “incident” that contains a recording, which includes no more than one second before the incident and one second after the incident. This incident audio snippet is preserved indefinitely for potential evidentiary use. We also use information collected to support, expand and improve our software algorithms as well as our gunfire detection and notification methods.

Our sensors are not designed or tuned to capture human voices, but are often installed in densely populated urban areas and it is possible they could pick up a human voice that is audible at the same time as the loud impulsive sound. Human voices are not impulsive and do not typically trigger the sensors, and unless accompanied by an impulsive sound no audio snippet would be transmitted out of the sensor and preserved as an incident audio snippet. Any human voice not associated with a loud impulsive sound would be temporarily cached on the sensor for 30 hours and would then be written over and permanently deleted. Information derived from loud impulsive sounds (“incidents”) and the associated audio snippet of the loud impulsive sounds are provided to our customers. Audio shared with our customers is limited, by both our technology and our privacy policies, to the audio snippet containing the incident.

Our handling and storage of data is subject to a variety of local, state, federal and foreign laws and regulations, including restrictions on audio monitoring and the collection, use, storage and disclosure of personal information. In the United States, such laws include federal and state consumer protection laws under which the Federal Trade Commission and state attorneys general have imposed standards for the collection, use, disclosure and security of personal information.

In addition, states are beginning to adopt and consider proposals for new comprehensive privacy laws and regulations. While these laws vary, the generally require companies to implement privacy policies and security measures, permit users to access, correct and delete personal information, inform individuals of security breaches that affect their personal information, and, in some cases, obtain individuals’ consent to use personal information for certain purposes. For example, California enacted the California Consumer Privacy Act of 2018, or CCPA, which took effect on January 1, 2020. The CCPA provides for civil penalties for violations, as well as a private right of action for statutory damages in connection with certain data breaches. Further, in November 2020, California voters passed the California Privacy Rights Act, or CPRA, which will substantially expand the CCPA when it takes effect on January 1, 2023. Among other things, the CPRA will introduce data minimization and storage limitation requirements and create a new regulatory agency to implement and enforce the law. Virginia has similarly enacted a comprehensive privacy law, the Consumer Data Protection Act, which emulates the CCPA and CPRA in many respects. Legislative proposals to adopt comprehensive privacy laws in other states are under consideration.

In addition, foreign laws and regulations pertaining to privacy, data protection and information security – including in Europe, Brazil and Japan – have becoming increasingly stringent in recent years and legislative proposals for similar requirements are being considered in several other major foreign economies. Many of these countries are also beginning to impose or increase restrictions on the transfer of personal information to other countries. Data protection restrictions in

these countries may limit the services we can offer in them, which in turn may limit demand for our services in such countries.

Many of the new and proposed laws and regulations concerning privacy, data protection and information security are in their early stages, and we cannot yet determine how these laws and regulations may be interpreted or impact our business. The lack of a clear and universal standard for handling and protecting such information means that these obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other requirements or our practices. Any failure or perceived failure by us to comply with privacy or security laws, policies, legal obligations or industry standards or any security incident that results in the unauthorized access to or disclosure of personal information or customer data may result in governmental enforcement actions, litigation, fines and penalties and/or adverse publicity, and could cause our customers to lose trust in us, which could have a material adverse effect on our reputation and on our business, financial condition and results of operations.

Some proposed laws or regulations concerning privacy, data protection and information security are in their early stages, and we cannot yet determine how these laws and regulations may be interpreted nor can we determine the impact these proposed laws and regulations, may have on our business. Such proposed laws and regulations may require companies to implement privacy and security policies, permit users to access, correct and delete personal information stored or maintained by such companies, inform individuals of security breaches that affect their personal information, and, in some cases, obtain individuals' consent to use personal information for certain purposes. In addition, a foreign government could require that any personal information collected in a country not be disseminated outside of that country, and we may not be currently equipped to comply with such a requirement. Our failure to comply with federal, state and international data privacy laws and regulators could harm our ability to successfully operate our business and pursue our business goals.

We may be subject to additional obligations to collect and remit certain taxes, and we may be subject to tax liability for past activities, which could harm our business.

State, local and foreign jurisdictions have differing rules and regulations governing sales, use, value added and other taxes, and these rules and regulations are subject to varying interpretations that may change over time, particularly with respect to software-as-a-service products like our solutions. Further, these jurisdictions' rules regarding tax nexus are complex and vary significantly. If one or more jurisdictions were to assert that we have failed to collect taxes for sales of our solutions, we could face the possibility of tax assessments and audits. A successful assertion that we should be collecting additional sales, use, value added or other taxes in those jurisdictions where we have not historically done so and do not accrue for such taxes could result in substantial tax liabilities and related penalties for past sales or otherwise harm our business and operating results.

Our ability to use our net operating losses to offset future taxable income may be subject to certain limitations.

As of March 31, 2021, we had federal net operating loss carryforwards ("NOLs") of approximately \$80.4 million, of which \$75.5 million will begin to expire in 2026, if not utilized. The remaining net operating losses of \$4.9 million can be carried forward indefinitely under the Tax Cuts and Jobs Act. As of December 31, 2020, we also had state NOLs of approximately \$51.1 million, which will expire, if not utilized, between 2021 through 2039. These federal and state NOLs may be available to reduce future income subject to income taxes. In general, under Section 382 of the Internal Revenue Code of 1986, as amended ("the Code"), a corporation that undergoes an "ownership change" is subject to limitations on its ability to utilize its NOLs to offset future taxable income. Past or future changes in our stock ownership, some of which are outside of our control, may have resulted or could result in an ownership change. State NOLs generated in one state cannot be used to offset income generated in another state. In addition, at the state level, there may be periods during which the use of NOLs is suspended or otherwise limited, such as a 2020 temporary suspension of the ability to use California NOLs and limitation on the use of certain tax credits to offset California income and tax liabilities, which could accelerate or permanently increase state taxes owed.

We may be subject to litigation for a variety of claims or to other legal requests, which could adversely affect our results of operations, harm our reputation or otherwise negatively impact our business.

We may be subject to litigation for a variety of claims arising from our normal business activities. These may include claims, suits, and proceedings involving labor and employment, wage and hour, commercial and other matters. The outcome of any litigation, regardless of its merits, is inherently uncertain. Any claims and lawsuits, and the disposition of

such claims and lawsuits, could be time-consuming and expensive to resolve, divert management attention and resources, and lead to attempts on the part of other parties to pursue similar claims. Any adverse determination related to litigation could adversely affect our results of operations, harm our reputation or otherwise negatively impact our business. In addition, depending on the nature and timing of any such dispute, a resolution of a legal matter could materially affect our future operating results, our cash flows or both.

An unfavorable outcome on any litigation matters could require us to pay substantial damages, or, in connection with any intellectual property infringement claims, could require us to pay ongoing royalty payments or could prevent us from selling certain of our products. As a result, a settlement of, or an unfavorable outcome on, any of the matters referenced above or other litigation matters could have a material adverse effect on our business, operating results, financial condition and cash flows.

We, or our customers, may be subject to requests for our data or information concerning our techniques and processes, pursuant to state or federal law (for example, public-records requests or subpoenas to provide information or to testify in court). This data and information, some of which we may deem to be confidential or trade secrets, could therefore become a matter of public record and also become accessible by competitors, which could negatively impact our business.

Changes in financial accounting standards may cause adverse and unexpected revenues fluctuations and impact our reported results of operations.

The accounting rules and regulations that we must comply with are complex and subject to interpretation by the Financial Accounting Standards Board, the Securities and Exchange Commission and various bodies formed to promulgate and interpret appropriate accounting principles. In addition, many companies' accounting disclosures are being subjected to heightened scrutiny by regulators and the public. Further, the accounting rules and regulations are continually changing in ways that could impact our financial statements.

Changes to accounting principles or our accounting policies on our financial statements going forward are difficult to predict, could have a significant effect on our reported financial results, and could affect the reporting of transactions completed before the announcement of the change. In addition, were we to change our critical accounting estimates, including the timing of recognition of subscription and professional services revenues and other revenues sources, our results of operations could be significantly impacted.

Failure to protect our intellectual property rights could adversely affect our business.

Our success depends, in part, on our ability to protect proprietary methods and technologies that we develop or license under patent and other intellectual property laws of the United States, as well as our brands, so that we can prevent others profiting from them. We rely on a combination of contractual and intellectual property rights, including non-disclosure agreements, patents, trade secrets, copyrights and trademarks, to establish and protect our intellectual property rights in our names, services, innovations, methodologies and related technologies. If we fail to protect our intellectual property rights adequately, our competitors might gain access to our technology and our business might be adversely affected.

As of March 31, 2021 we had 34 issued patents directed to our technologies, 32 are granted in the United States, as well as one granted patent in Israel and one granted patent in Mexico. The issued patents expire on various dates from 2022 to 2034. We also license one patent from a third party, which expires in 2023. We have patent applications pending for examination in the United States, Europe, Mexico and Brazil, but we cannot guarantee that these patent applications will be granted. We also license one other U.S. patent from one third party. The patents that we own or those that we license from others (including those that may be issued in the future) may not provide us with any competitive advantages or may be challenged by third parties.

The process of obtaining patent protection is expensive and time-consuming, and we may not be able to prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner. Even if issued, there can be no assurance that these patents will adequately protect our intellectual property, as the legal standards relating to the validity, enforceability and scope of protection of patent and other intellectual property rights are uncertain.

Any patents that are issued may subsequently be invalidated or otherwise limited, allowing other companies to develop offerings that compete with ours, which could adversely affect our competitive business position, business prospects and financial condition. In addition, issuance of a patent does not guarantee that we have a right to practice the patented invention. Patent applications in the United States are typically not published until 18 months after their earliest priority date or, in some cases, not at all, and publications of discoveries in industry-related literature lag behind actual discoveries. We cannot be certain that third parties do not have blocking patents that could be used to prevent us from marketing or practicing our software or technology.

Effective patent, trademark, copyright and trade secret protection may not be available to us in every country in which our software is available. The laws of some foreign countries may not be as protective of intellectual property rights as those in the United States (in particular, some foreign jurisdictions do not permit patent protection for software), and mechanisms for enforcement of intellectual property rights may be inadequate. Additional uncertainty may result from changes to intellectual property legislation enacted in the United States, including the recent America Invents Act, or to the laws of other countries and from interpretations of the intellectual property laws of the United States and other countries by applicable courts and agencies. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property.

We rely in part on trade secrets, proprietary know-how and other confidential information to maintain our competitive position. Although we endeavor to enter into non-disclosure agreements with our employees, licensees and others who may have access to this information, we cannot assure you that these agreements or other steps we have taken will prevent unauthorized use, disclosure or reverse engineering of our technology. Moreover, third parties may independently develop technologies or products that compete with ours, and we may be unable to prevent this competition. Third parties also may seek access to our trade secrets, proprietary know-how and other confidential information through legal measures (for example, public-records requests or subpoenas to provide information or to testify in court) and it could be expensive to defend against those requests. Disclosure of our trade secrets, proprietary know-how and other confidential information could negatively impact our business.

We might be required to spend significant resources to monitor and protect our intellectual property rights. We may initiate claims or litigation against third parties for infringement of our proprietary rights or to establish the validity of our proprietary rights. Litigation also puts our patents at risk of being invalidated or interpreted narrowly and our patent applications at risk of not issuing. Additionally, we may provoke third parties to assert counterclaims against us. We may not prevail in any lawsuits that we initiate, and the damages or other remedies awarded, if any, may not be commercially viable. Any litigation, whether or not resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel, which may adversely affect our business, operating results, financial condition and cash flows.

We may be subject to intellectual property rights claims by third parties, which are extremely costly to defend, could require us to pay significant damages and could limit our ability to use certain technologies.

Companies in the software and technology industries, including some of our current and potential competitors, own large numbers of patents, copyrights, trademarks and trade secrets and frequently enter into litigation based on allegations of infringement or other violations of intellectual property rights. In addition, many of these companies have the capability to dedicate substantially greater resources to enforce their intellectual property rights and to defend claims that may be brought against them. The litigation may involve patent holding companies or other adverse patent owners that have no relevant product revenues and against which our patents may therefore provide little or no deterrence. We may have previously received, and may in the future receive, notices that claim we have misappropriated, misused, or infringed other parties' intellectual property rights, and, to the extent we gain greater market visibility, we face a higher risk of being the subject of intellectual property infringement claims.

There may be third-party intellectual property rights, including issued or pending patents that cover significant aspects of our technologies or business methods. Any intellectual property claims, with or without merit, could be very time-consuming, could be expensive to settle or litigate and could divert our management's attention and other resources. These claims could also subject us to significant liability for damages, potentially including treble damages if we are found to have willfully infringed patents or copyrights. These claims could also result in our having to stop using technology found to be in violation of a third party's rights. We might be required to seek a license for the intellectual property, which may not be available on a timely basis, on reasonable terms or at all. We also may be required to modify our products, services, internal systems or technologies. Even if a license were available, we could be required to pay significant

royalties, which would increase our operating expenses. As a result, we may be required to develop alternative non-infringing technology, which could require significant effort and expense. If we cannot license or develop technology for any infringing aspect of our business, we would be forced to limit or stop sales of our software and may be unable to compete effectively. Any of these results would adversely affect our business, operating results, financial condition and cash flows.

Our use of open source software could subject us to possible litigation.

A portion of our technologies incorporates open source software, and we expect to continue to incorporate open source software into our platform in the future. Few of the licenses applicable to open source software have been interpreted by courts, and their application to the open source software integrated into our proprietary technology platform may be uncertain. If we fail to comply with these licenses, then pursuant to the terms of these licenses, we may be subject to certain requirements, including requirements that we make available the source code for our software that incorporates the open source software. We cannot assure you that we have not incorporated open source software in our software in a manner that is inconsistent with the terms of the applicable licenses or our current policies and procedures. If an author or other third party that distributes such open source software were to allege that we had not complied with the conditions of one or more of these licenses, we could incur significant legal expenses defending against such allegations. Litigation could be costly for us to defend, have a negative effect on our operating results and financial condition or require us to devote additional research and development resources to change our technology platform.

Risks Related to the Ownership of Our Common Stock

Our stock price may be volatile or may decline regardless of our operating performance, resulting in substantial losses for investors.

The market price of our common stock has fluctuated and may continue to fluctuate significantly in response to numerous factors, many of which are beyond our control, including the factors listed below and other factors described in this “Risk Factors” section:

- ⌚ actual or anticipated fluctuations in our operating results;
- ⌚ the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;
- ⌚ failure of securities analysts to initiate or maintain coverage of our company, changes in financial estimates by any securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- ⌚ ratings changes by any securities analysts who follow our company;
- ⌚ changes in the availability of federal funding to support local law enforcement efforts, or local budgets;
- ⌚ announcements by us of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;
- ⌚ changes in operating performance and stock market valuations of other software companies generally;
- ⌚ price and volume fluctuations in the overall stock market, including as a result of trends in the economy as a whole;
- ⌚ changes in our board of directors or management;
- ⌚ sales of large blocks of our common stock, including sales by our executive officers, directors and significant stockholders;
- ⌚ lawsuits threatened or filed against us;

- ① novel and unforeseen market forces and trading strategies, as well as short sales, hedging and other derivative transactions involving our capital stock;
- ① the impact of the COVID-19 pandemic;
- ① general economic conditions in the United States and abroad;
- ① other events or factors, including those resulting from pandemics, protests against racial inequality, protests against police brutality and movements such as “Defund the Police”, war, incidents of terrorism or responses to these events; and
- ① media misperception of our sales and customer relationships, including press announcements or media mentions of future sales that may be misleading or inaccurate.

In addition, stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many software companies. Stock prices of many software companies have fluctuated in a manner unrelated or disproportionate to the operating performance of those companies. Broad market and industry fluctuations, as well as general economic, political, regulatory and market conditions, may negatively impact the market price of our common stock. In the past, stockholders have instituted securities action litigation following periods of market volatility. If we were to become involved in securities litigation, it could subject us to substantial costs, divert resources and the attention of management from our business and adversely affect our business, operating results, financial condition and cash flows.

Substantial future sales of shares of our common stock could cause the market price of our common stock to decline.

Certain holders of our shares of common stock have the right, subject to various conditions and limitations, to include their shares of our common stock in registration statements relating to our securities, including approximately 3.3 million shares that were registered in connection with the Registration Statement on Form S-3 that became effective on July 27, 2018, of which approximately 136,000 were sold in an underwritten registered follow-on offering in March 2019. If the offer and sale of these shares are registered, they will be freely tradable without restriction under the Securities Act. In addition, non-affiliates have the ability to sell shares of our common stock in the open market or through block trades without being subject to volume restrictions under Rule 144 of the Securities Act. In addition, in the future we may issue common stock or other securities if we need to raise additional capital. The number of new shares of our common stock issued in connection with raising additional capital could constitute a material portion of the then outstanding shares of our common stock. In the event a large number of shares of common stock are sold in the public market, such share sales could reduce the trading price of our common stock.

Stock repurchases could increase the volatility of the trading price of our common stock and diminish our cash reserves, and we cannot guarantee that our stock repurchase program will enhance long-term stockholder value.

In May 2019, our board of directors adopted a stock repurchase program for up to \$15 million of our common stock, of which \$10.5 million had been utilized as of March 31, 2021 leaving \$4.5 million remaining. Although our board of directors has authorized the stock repurchase program, it does not obligate us to repurchase any specific dollar amount or number of shares, there is no expiration date for the stock repurchase program, and the stock repurchase program may be modified, suspended or terminated at any time and for any reason. The timing and actual number of shares repurchased under the stock repurchase program will depend on a variety of factors, including the acquisition price of the shares, our liquidity position, general market and economic conditions, legal and regulatory requirements and other considerations. Our ability to repurchase shares may also be limited by restrictive covenants in our existing credit agreement or in future borrowing arrangements we may enter into from time to time.

Repurchases of our shares could increase the volatility of the trading price of our stock, which could have a negative impact on the trading price of our stock. Similarly, the future announcement of the termination or suspension of the stock repurchase program, or our decision not to utilize the full authorized repurchase amount under the stock repurchase program, could result in a decrease in the trading price of our stock. In addition, the stock repurchase program could have the impact of diminishing our cash reserves, which may impact our ability to finance our growth, complete acquisitions and execute our strategic plan. There can be no assurance that any share repurchases we do elect to make will enhance

stockholder value because the market price of our common stock may decline below the levels at which we repurchased our shares. Although our stock repurchase program is intended to enhance long-term stockholder value, we cannot guarantee that it will do so and short-term stock price fluctuations could reduce the effectiveness of the stock repurchase program.

If securities or industry analysts do not publish research or reports about our business, or publish negative reports about our business, our share price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business, our market and our competitors. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our shares of common stock or change their opinion of our shares of common stock, our share price would likely decline. If one or more of these analysts cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

We are an “emerging growth company” and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our common stock less attractive to investors.

We are an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act (the “JOBS Act”), and we take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies” including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We will remain an “emerging growth company” for up to five years, although we will cease to be an “emerging growth company” upon the earliest of (i) December 31, 2022, (ii) the last day of the first fiscal year in which our annual gross revenues are \$1.07 billion or more, (iii) the date on which we have, during the previous rolling three-year period, issued more than \$1 billion in non-convertible debt securities or (iv) the date on which we are deemed to be a “large accelerated filer” as defined in the Exchange Act. We cannot predict if investors will find our common stock less attractive or our company less comparable to certain other public companies because we will rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

We incur substantial costs as a result of being a public company.

As a public company, we are incurring significant levels of legal, accounting, insurance and other expenses that we did not incur as a private company. We are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, the Dodd-Frank Act, the listing requirements of the Nasdaq Capital Market, and other applicable securities rules and regulations. Compliance with these rules and regulations increases our legal and financial compliance costs, makes some activities more difficult, time-consuming or costly and increases demand on our systems and resources as compared to when we operated as a private company. The Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and operating results. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and, if required, improve our disclosure controls and procedures and internal control over financial reporting to meet this standard, significant resources and management oversight may be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business and operating results. Although we have already hired additional corporate employees to comply with these requirements, we may need to hire more corporate employees in the future or engage outside consultants, which would increase our costs and expenses.

In addition, changing laws, regulations and standards relating to corporate governance and public disclosure are creating uncertainty for public companies, increasing legal and financial compliance costs and making some activities more time-consuming. These laws, regulations and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We intend to invest resources to comply with evolving laws, regulations and standards, and this investment may result in increased general and administrative expenses and a diversion of management’s time and attention from revenue-generating activities to compliance activities.

If our efforts to comply with new laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to their application and practice, regulatory authorities may initiate legal proceedings against us and our business may be adversely affected.

As a result of disclosure of information in this report and in the filings that we are required to make as a public company, our business, operating results and financial condition have become more visible, which has resulted in, and may in the future result in threatened or actual litigation, including by competitors and other third parties. If any such claims are successful, our business, operating results and financial condition could be adversely affected, and even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and adversely affect our business, operating results and financial condition.

We do not intend to pay dividends for the foreseeable future.

We have never declared or paid any cash dividends on our common stock and do not intend to pay any cash dividends in the foreseeable future. We anticipate that we will retain all of our future earnings for use in the development of our business and for general corporate purposes. Any determination to pay dividends in the future will be at the discretion of our board of directors. Accordingly, investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of our company more difficult, limit attempts by our stockholders to replace or remove our current management and limit the market price of our common stock.

Provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing a change of control or changes in our management. Our certificate of incorporation and bylaws include provisions that:

- ⌚ establish a classified board of directors so that not all members of our board of directors are elected at one time;
- ⌚ permit the board of directors to establish the number of directors and fill any vacancies and newly-created directorships;
- ⌚ provide that directors may only be removed for cause;
- ⌚ require super-majority voting to amend some provisions in our certificate of incorporation and bylaws;
- ⌚ authorize the issuance of “blank check” preferred stock that our board of directors could use to implement a stockholder rights plan;
- ⌚ eliminate the ability of our stockholders to call special meetings of stockholders;
- ⌚ prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- ⌚ provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and
- ⌚ establish advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted upon by stockholders at annual stockholder meetings.

In addition, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally prohibits stockholders owning 15% or more of our outstanding voting stock from merging or otherwise combining with us for a period of three years following the date on which the stockholder became a 15% stockholder without the consent of our board of directors. These provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors, which is responsible for appointing the members of our management, and otherwise discourage management takeover attempts.

Our certificate of incorporation contains exclusive forum provisions that could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us.

Pursuant to our certificate of incorporation, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware is the sole and exclusive forum for (1) any derivative action or proceeding brought on our behalf, (2) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers or other employees to us or our stockholders, (3) any action asserting a claim arising pursuant to any provision of the Delaware General Corporation Law, our certificate of incorporation or our bylaws or (4) any action asserting a claim governed by the internal affairs doctrine. Our certificate of incorporation further provides that any person or entity purchasing or otherwise acquiring any interest in shares of our common stock is deemed to have notice of and consented to the foregoing provision.

Our certificate of incorporation further provides that the federal district courts of the United States of America will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act. These forum selection clauses in our certificate of incorporation may limit our stockholders' ability to obtain a favorable judicial forum for disputes with us.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Unregistered Sales of Equity Securities

In January 2021, we issued 50,716 shares of our common stock to the holder of our outstanding warrants upon that holder's exercise pursuant to a cashless exercise provision. The warrants had an exercise price of \$0.17 per share. The Company issued the shares of common stock upon such exercise in reliance on Section 4(a)(2) of the Securities Act.

(b) None.

(c) Issuer Purchases of Equity Securities

The following table sets forth for the indicated period, share repurchases of our common stock:

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as part of Publicly Announced Program	Dollar Value of Shares that May Yet Be Purchased Under the Program (in thousands)
January 1, 2021- January 31, 2021	—	—	—	\$ 6,668
February 1, 2021- February 28, 2021	—	—	—	\$ 6,668
March 1, 2021- March 31, 2021	56,162	\$ 39.02	56,162	\$ 4,482
Total	56,162		56,162	

(1) All repurchases were made as part of our publicly announced stock repurchase program. In May 2019, we announced that our board of directors approved a stock repurchase program, under which we were authorized to repurchase up to \$15 million of our common stock. The repurchase program has no expiration date and may be modified, suspended or discontinued at any time. For further information regarding our stock repurchase program, see Note 10, Stock Repurchase Program, of the accompanying notes to the condensed consolidated financial statements.

Item 6. Exhibits

A list of exhibits is set forth below.

Exhibit Index

Exhibit Number	Exhibit Description	Incorporated by Reference				Filed Herewith
		Form	File No.	Exhibit	Filing Date	
3.1	Amended and Restated Certificate of Incorporation	8-K	001-38107	3.1	June 13, 2017

CERTIFICATION OF PERIODIC REPORT UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Ralph A. Clark, certify that:

1. I have reviewed this Form 10-Q of ShotSpotter, Inc.;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
